

APPENDIX H – PUBLIC INVOLVEMENT MATERIALS

Tomorrow's Energy, **TOGETHER.**

To meet the region's growing electricity needs and demand for clean energy, Minnesota Power and Dairyland Power Cooperative are working together to incorporate the flexibility of natural gas to ensure power 24/7 year-round.

This modern, efficient, flexible resource will support the growth of renewable energy as both companies transition to a clean energy future.

NemadjiTrailEnergyCenter.com

To meet the region's growing electricity needs and demand for clean energy, Minnesota Power and Dairyland Power Cooperative are working together to incorporate the flexibility of natural gas to ensure power 24/7 year-round.

About the Project

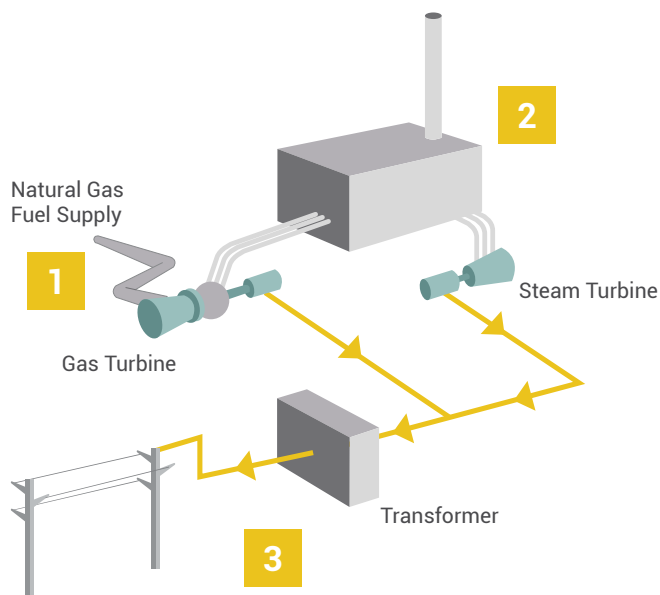

Minnesota Power and Dairyland Power Cooperative are proposing to build a 525-550 megawatt natural gas generation facility in Superior, Wisconsin, called the Nemadji Trail Energy Center. This center will use flexible and efficient natural gas to enable the addition of more renewable energy resources such as wind and solar, and to deliver affordable and reliable power to consumers in the region.

The Facility

This project will be a combined-cycle gas generation facility that burns natural gas in a combustion turbine.

HOW IT WORKS

- 1** Natural gas is burned to produce high-pressure, high-temperature gas that spins a turbine.
- 2** Equipment in this building captures waste heat to create steam that spins a second turbine.
- 3** Energy from the turbines flows to a transformer and continues through the electric grid to power homes and businesses.

Facility Location

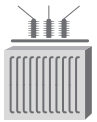

The proposed project is located in an industrial area and has access to existing electrical and natural gas infrastructure. The project will require these additional components:

Approximately seven-mile natural gas pipeline using existing right-of-way

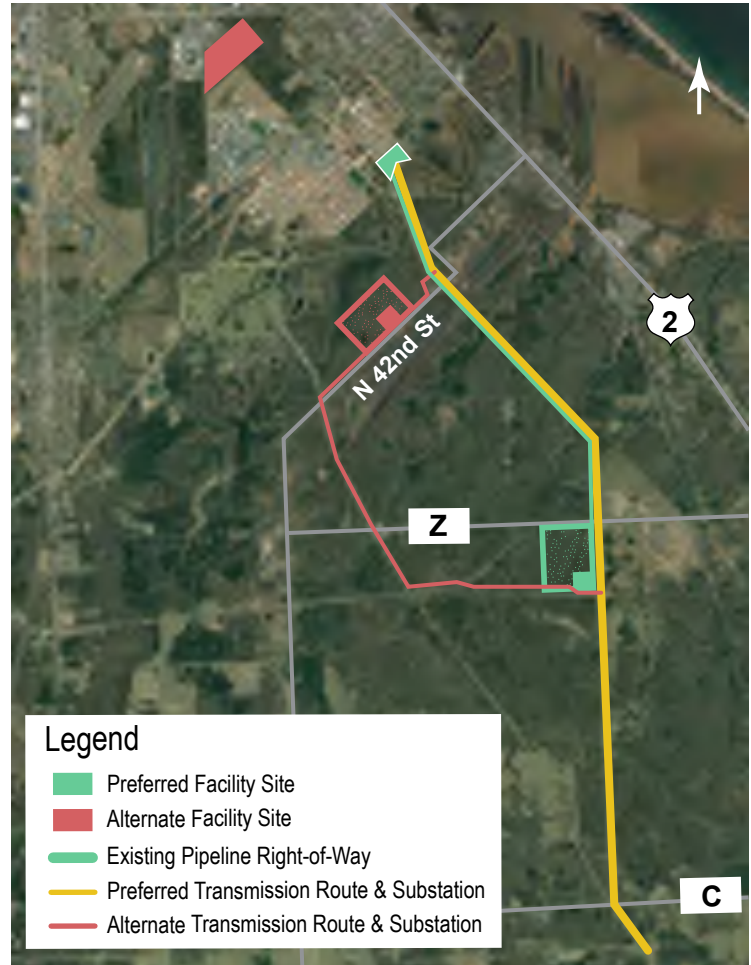

Approximately four-mile, 345kV transmission line parallel to existing right-of-way

Approximately 10-acre substation associated with the transmission line

The Wisconsin permitting process requires two proposed alternatives; however, only one facility site, transmission line route, and substation location are preferred by Minnesota Power and Dairyland Power - as shown on the map.

Project Benefits

- ☒ Supports customer load
- ☒ Supports renewable energy resources
- ☒ Reduces carbon emissions
- ☒ Largest private investment in Douglas County
- ☒ Over \$1 billion in regional economic benefit over 20 years
- ☒ Creates 260 jobs during peak construction and up to 25 full-time permanent jobs
- ☒ Provides approximately \$1 million in annual, local tax benefit

Schedule

Public participation/comment period.

2018-2019

2025

Operation

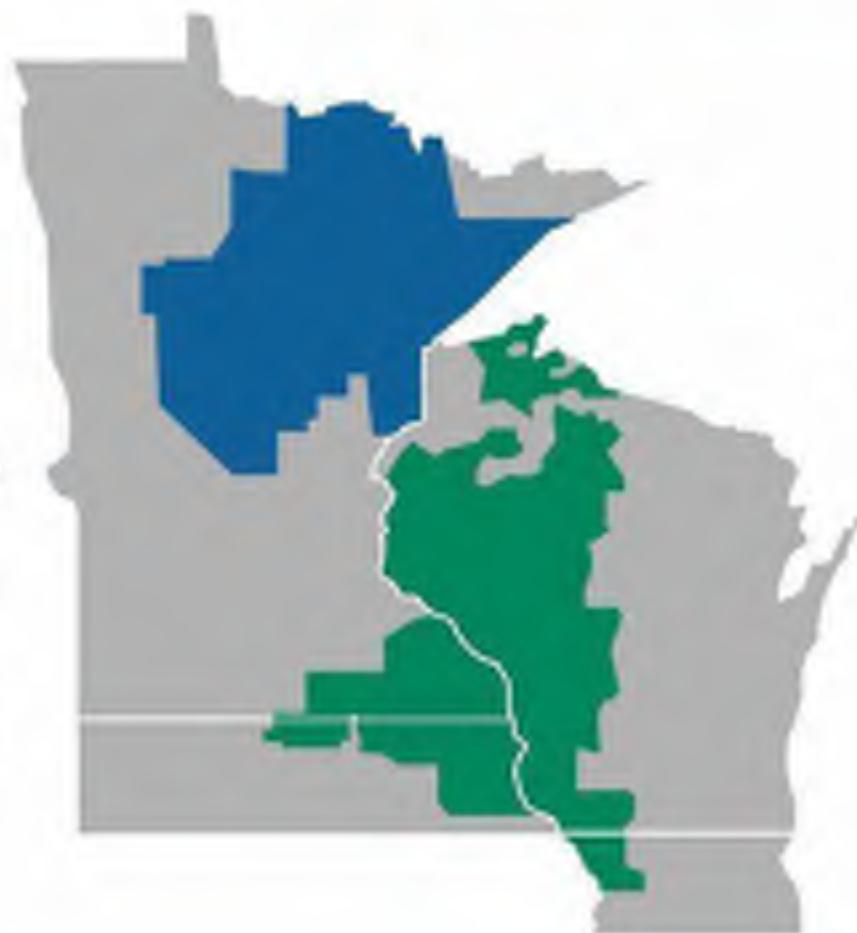

The purpose of today's meeting is to:

-  Learn about the project
-  Meet the team
-  Ask questions

- Headquartered in Duluth, MN
- 26,000 sq. mi. Service Area
- Serves 16 municipal wholesale customers
- Serves 145,000 retail customers

- Headquartered in La Crosse, WI
- 44,500 sq. mi. Service Area spanning 4 states
- Serves 24 member cooperatives and 17 municipalities
- Serves over 600,000 people

We're transforming our resource mix to provide safe, reliable and clean energy.

■ Coal ■ Renewables ■ Manitoba Hydro ■ Natural Gas ■ Market Purchases/Municipals (DPC)

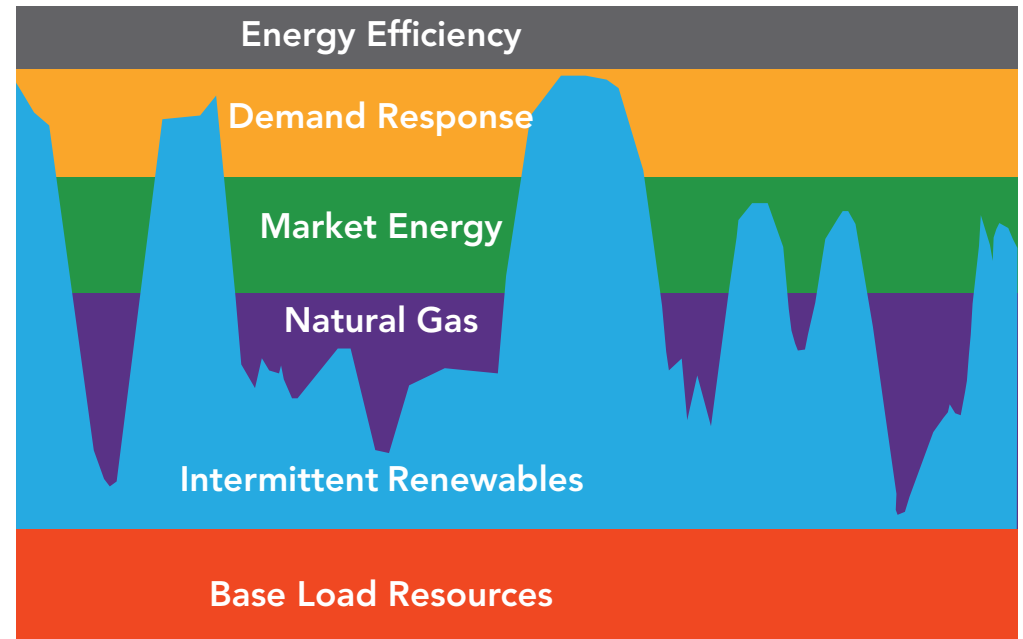

Natural gas maintains reliability by supporting renewables.

Agreements with some of our customers to interrupt service at times of peak load—also used to balance resources and maintain reliability.

Natural gas and purchases from energy markets are used to fill in the gaps between the peaks and valleys of variable wind and solar power. **Natural gas provides reliable power while buffering the volatility of energy market prices.**

Our traditional coal-fired units provide consistent, dependable baseload power.

Energy Resource Components

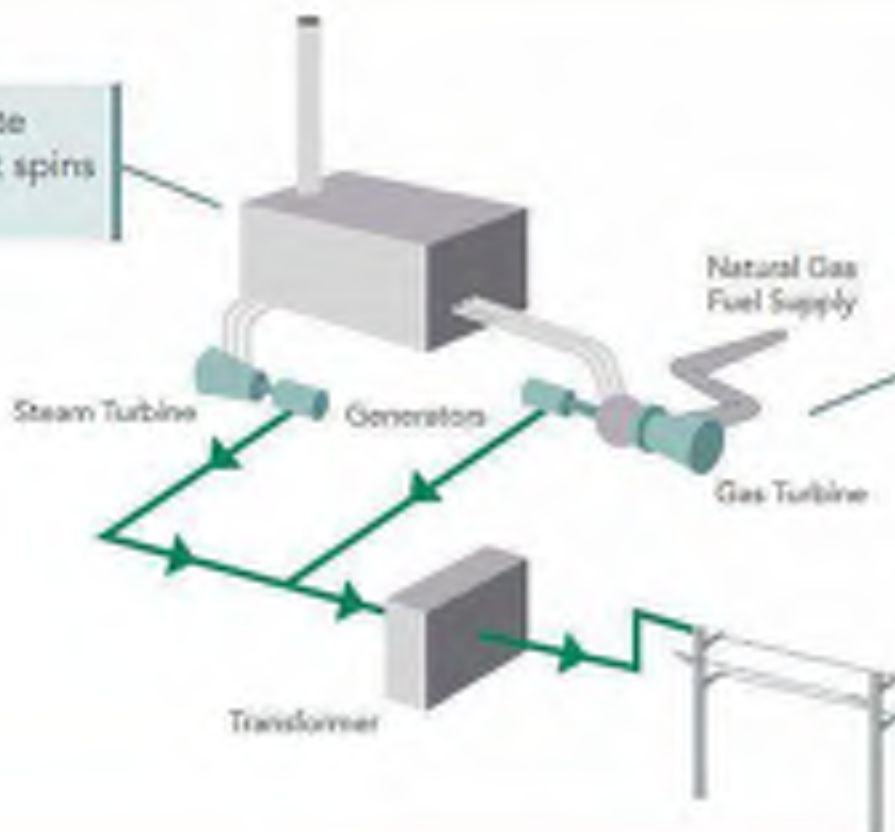

The Nemadji Trail Energy Center will generate 525-550 megawatts.

1 megawatt powers ~1,000 homes.

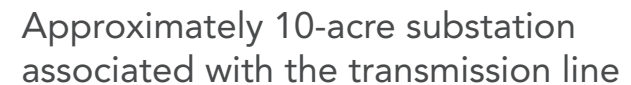

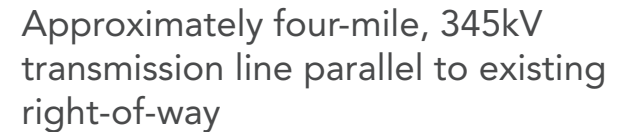

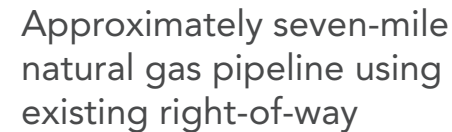

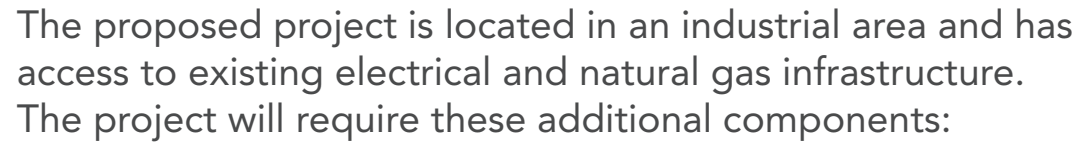

This facility captures waste heat to create steam that spins a second turbine.

Natural gas is burned to produce high-pressure, high-temperature gas that spins a turbine.

Energy from the turbines flows to a transformer and continues through the electric grid to power homes and businesses.

FACILITY LOCATION

The Wisconsin permitting process requires two proposed alternatives; however, only one facility site, transmission line route, and substation location are preferred by Minnesota Power and Dairyland Power.

Nemadji Trail Energy Center

ENVIRONMENTAL CONSIDERATIONS

AIR

NATURAL GAS FACILITIES RESULT IN LESS EMISSIONS THAN TRADITIONAL GENERATION FACILITIES.

Carbon Dioxide

Mercury

NO_x, CO, SO₂, VOC, PM₁₀

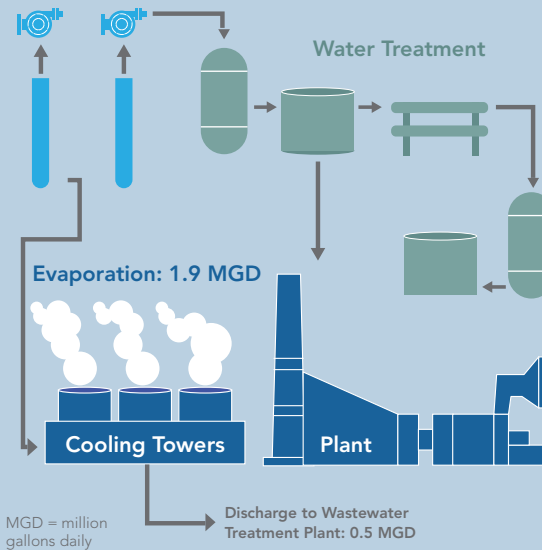

WATER

FACILITY WATER USAGE

The Facility uses a gas combustion turbine to generate electricity. The heat generated from that process is used to make steam to generate even more electricity in a steam turbine. In order to create steam, water is needed. We are working closely with the Wisconsin Department of Natural Resources in regards to a well permit application to ensure the Facility will not impact precious water resources.

Well Water: 2.4 MGD

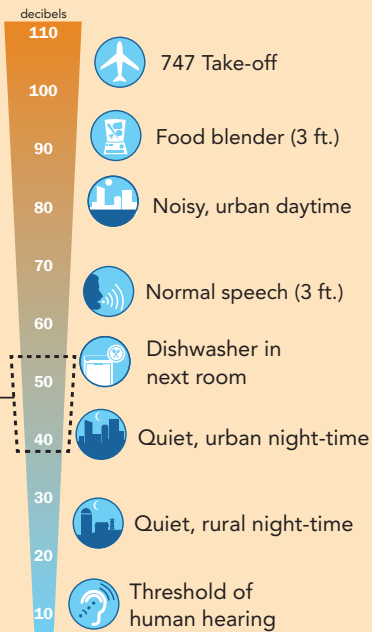

NOISE

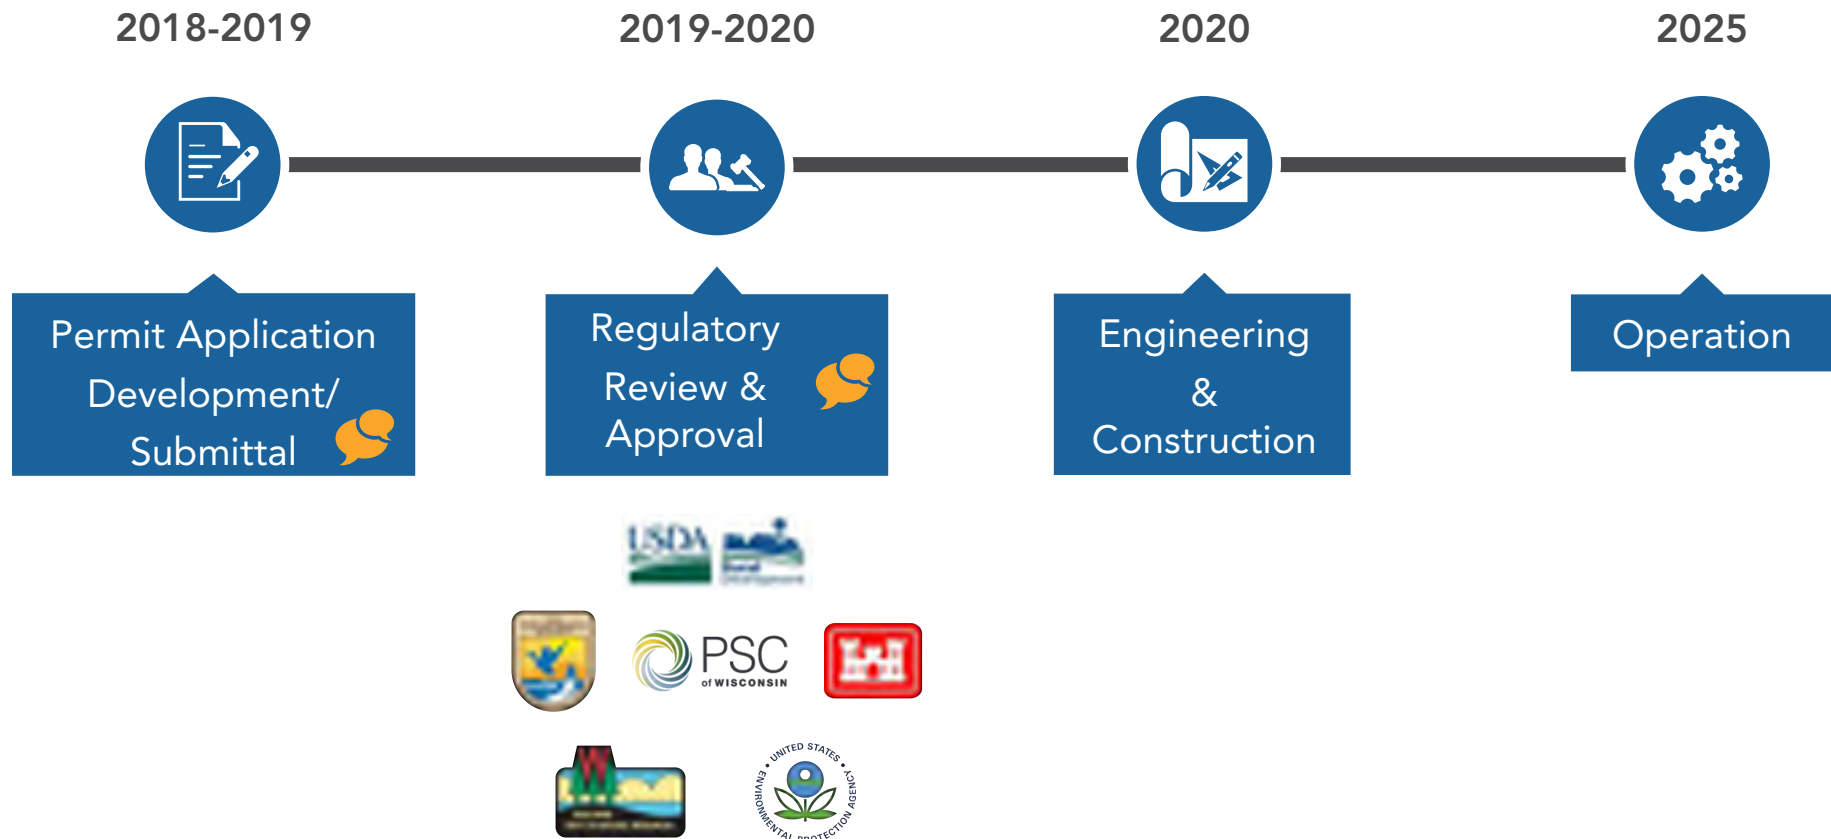

COMPARISON OF NOISE LEVELS

Noise levels from the Facility to the adjacent neighborhood are expected to be between 40 and 55 decibels.

Nemadji Trail Energy Center

I would like more information on the
effect of the moisture from the cooling
tower. How will it affect neighbors?
Will there be a high humidity level
in the area? Will it cause icing
in cold winter months?

I am aware that it won't be running
at full capacity, but the potential of
the release of M&D is concerning

Thank you -

I AM NOT OPPOSED TO THIS PROJECT, PER SE.
THE CONVERSION FROM COAL TO NATURAL GAS
IS FINE w/ME. WIND ENERGY IS QUESTIONABLE
DUE TO ITS NEWLY FOUND NEGATIVE INFLUENCE
ON CLIMATE CHANGE.
HOWEVER, I AM A 'NIMBY' PROPOSER. TAKE
THIS PROJECT & BUILD IN DULUTH, GARY,
HERRMANTON, BUT NOT HERE.
THIS COMMUNITY HAS, OVER SEVERAL DE-
CADES, SHOULDERED MORE THAN ITS FAIR
SHARE OF RISK (NOTE: HUSKY OIL & SOME
PETROLEUM - w/AN AIRPORT AT THEIR
CENTER) w/VERY LITTLE RECOMPENSE.
I AM ALSO OF A MIND THAT MPR
SHOULD ASSUME ALL FINANCING w/OUT
BURDENING ITS CUSTOMER w/HIGHER RATES
IN HD. ENERGY COSTS. ITS THE LEAST
ECONOMIC HARM MPR WOULD SUFFER.

and field team. The package was sent via campus mail Thursday. “Community service and community involvement has always been a pillar for us,” Bursik said. Any time they can help out and impact people positively, he said, it’s “definitely something we want to be a part of.” The local American Red Cross chapter has deployed eight people over the past several days to the Houston area, the Duluth News Tribune reported, including a pair of registered nurses and an emergency response vehicle with volunteer specialists in mass feeding operations. The volunteers come from around the Northland, said Dan Williams, the local American Red Cross executive director

whose agency is gearing up for a protracted recovery by anticipating a new flux of volunteers. “We’re going to be doing sheltering and feeding for months,” he said. “This is going to be a long haul.” Many feel the need to give, but the Wisconsin Department of Agriculture, Trade and Consumer Protection is urging consumers to do their research before they send money to any charity claiming to help those affected by the flooding. “Scammers see tragedies as a way to line their pockets at the expense of

well-meaning citizens,” said Frank Frassetto, division administrator for Trade and Consumer Protection. “Give generously to a charity if you are inclined, but always research an organization before sending money.” He advised consumers to research charities by name at www.charitynavigator.org or www.give.org before donating. Be leery of high-pressure pitches or any requests to wire money and feel free to seek out contact information for a charity or operation if you question its legitimacy. Consumers were warned to watch for network messages, e-mails or texts that claim to have exclusive information or photos. Clicking on attachments or links in these communications can expose your computer or phone to malicious software. *Duluth News Tribune reporter Brady Slater contributed to this report.*

CONSTRUCTION

school’s new administration and kitchen areas, is once again connected. The only lunchtime change students should see is a row of chairs and music stands stacked against the new instrument storage space on the south wall. Band students will use the new multi-purpose room for classes, sharing it with the wrestling program. Parking lots are paved and ready for use, although there will be fewer spots available this year. The student parking lot northwest of the school will remain open, Olson said. Fenced-in areas between the lot and building will remain enclosed through the school year to provide a laydown site for construction material. Students will also be able to access another 115 parking spots in the east lot across Spartan Drive, fewer than last year. “We lost about 50 slots over there,” Olson said. Contractors will be utilizing the parking lot on the south side of North 28th Street by the soccer fields, so it will not be available to students, teachers or parents. Teachers will be able to park in the northeast parking lot between the sports complex and the school. The newly-paved lot also has fewer spaces than before, about 85. He said the school has an arrangement with the University of Wisconsin-Superior to use the Wessman Arena parking lot as overflow parking for teachers, and 21 staff members will park in the bus loop on the east side of the school. Parents will still be able to drop off in the bus loop and the white-marked area along Spartan Drive. They can also drop off students and park along Catlin Avenue. Buses will pick up and drop off students in the eastern lot beside the technical education workshops. The students will enter the school through door 14. Classrooms in the circle portion of the school have waxed cement floors following this summer’s asbestos abatement. Reflective tape will be placed on the floors of the metal, wood and auto shops, tracing evacuation routes. Every classroom will have two exits, Olson said. “Parents are worried about safety in the building,” he said. “We wouldn’t be opening up this place if we did not think it was safe.” While the main number to the high school remains the same, staff members have new extension numbers because the district switched to a new phone system. **Rolling with the changes** Social studies teacher Chad Postal has watched the landscape at the high school change over the summer while coaching the bigger, faster, stronger program. “It looks pretty good now,” he said. Postal has been hear-

ing positive feedback from returning teachers. “I think everybody realizes that in a year we’re going to be in a new facility and we’re just going to deal with all the little things that come up and it’s not going to be a big deal,” he said. “It’ll all be worth it in the end.” As with parking, classroom space will be a little tighter this year. “There are a number of teachers who had to move because their area was destroyed,” Olson said. “So they’re on carts; they’re sharing multiple rooms; their office space is a little smaller now than they would have wanted it.” From the beginning, he said, these teachers were part of the solution, working out ways to coexist as the school is rebuilt around them. The assistant principal gave a shout-out to the high school custodians and engineers for their teamwork and patience. “They’ve done just a tremendous amount of work,” Olson said. “Their schedule got very condensed with all the things they had to move.” There were times where equipment and classroom items had to be moved two or three different times, he said. “We’re all working together to get things done,” said custodian Janet Anderson. “It’s a team effort, no doubt about it.” Visit the district’s redesigned website, www.superior.k12.wi.us, under the Superior High School tab for more information.

TAX

from Page A1

a quick lesson on how to fire a crossbow — the senator’s first archery experience — the arrow flew, striking the center circle of the target. Baldwin stopped at FeraDyne Outdoors on Wednesday to talk to company officials about a tax reform proposal she recently introduced that would make it easier for small manufacturers to take advantage of research and development tax credits available for innovation. The 21st Century Manufacturing Act is a tax reform designed to revise the research and development tax credit to make them less onerous for small manufacturers, encourage investment in next-generation manufacturing technology, increase the credit from 14 to 20 percent, allow firms to use cost reduction and creating new uses for products to count as qualified research expenditures, count managers of research products as qualified expenditures and allow companies to deduct ten percent from expenditures on connected manufacturing equipment. “Often times the R&D tax credit is not used,” Baldwin said. “It’s really

narrowly defined, the white lab coats and laboratory, and not enough manufacturing.” However, she said, often times, it is manufacturers that come up with the innovations that create new products that also create jobs. “This expansion makes it more generous; it will give people more incentive to apply for it,” Baldwin said. “And it simplifies the process.” Baldwin said she decided to visit FeraDyne because they are a major employer in Superior. The research and development department is an important part of FeraDyne’s business, and will allow the company that employs about 300 people to launch 75 new products this year, according to Craig Tinsley, FeraDyne’s vice president of operations. The company, which acquired Field Logic in 2015, makes products under many brands including Rage, Block Targets, GlenDel, Muzzy, Trufire, IQ Bowsight, Hurricane, Sure-Loc precision sites — credited with five Olympic gold medals in archery — and the recently acquired Eastman Outdoors in Flushing, Mich., which offers products also under the brands Carbon Express and Gorrilla Gear. Despite Feradyne’s innovation, Chief Financial

Officer Mike Janousek said the company made the decision not to apply for R&D tax credits because the documentation, time and tax accounting needed to take advantage of the credits was cost-prohibitive. “If they loosen up the requirements, we will definitely take advantage of it,” Janousek said. The changes proposed would also allow the company to get credit for the expense of modifying equipment, which would be beneficial to the company as well, he said. “Our big thing is to try to be American made, U.S. jobs and grow as much as we can,” Janousek said. “If we can get some tax legislation that will help us continue on with that, I think that will be beneficial for us. It’s not only good for the country — it’s good for the local and it’s good for our employees overall.” Baldwin said she is hopeful her legislation will be among the tax policies Congress considers as it takes up tax reform after legislators head back to Washington, D.C., next week. After all, she said, many of the innovations made in the world and in Wisconsin are made by manufacturers. “We are a state that makes things,” said Baldwin, a proponent for “Made in Wisconsin.”

SENIOR MEALS

Senior Connections offers hot, nutritious meals Monday-Friday for people 60 or older. Meals are delivered to homebound individuals and served at congregate sites in Douglas County. A \$4 per meal contribution is requested, but no one is denied because of inability to pay. Call (715) 394-3611 or (800) 870-2181 to make reservations 24 hours in advance for meal sites, including Senior Center, Monday-Friday; Phoenix Villa, Monday-Friday; Amnicon Senior Center, Tuesday-Wednesday; Solon Springs Community Center, Thursday-Friday; Gordon Town Hall, Tuesday-Friday; and Holy Assumption Church, Monday-Thursday.

Next week's menu includes:

Sept. 11: Egg salad on wheat bread, vegetable barley soup, fresh fruit.

Sept. 12: Ham slice, macaroni and cheese, coleslaw, wheat roll, fruited Jell-O.

Sept. 13: Lasagna, tossed salad, cauliflower, garlic bread stick, brownie.

Sept. 14: Baked fish, au gratin potatoes, carrot coins, wheat roll, white Jell-O cake.

Sept. 15: Meatloaf, baked potato, green beans, wheat bread, pears.

Call (715) 372-5474 for reservations at the Kro Bar & Grill in Brule, Tuesday-Friday.

Flag raising honors father, son veterans from Superior

Forum focuses on moving goods in Twin Ports

A father and son from Superior — both serving the nation during time of war — will be honored with a flag raising.

Philip Meysman served in the U.S. Navy in the South Pacific during World War II; his oldest son, Raymond Meysman, served in the U.S. Army's 25th Infantry Division and served in Vietnam from 1968 to 1969.

At the same time Philip A. Meysman served, his brother, Frank Meysman, served in the South Pacific with the U.S. Army. Philip was the owner of Meysman Accounting and Tax Service for many years. Throughout his life, Philip was very active in bowling, golfing, fishing and hunting. He also loved politics. He was a member of Holy Assumption Catholic Church, the local Veterans of Foreign Wars (VFW) and the Knights of Columbus. Phil was a lifelong resident of Superior. Born June 17, 1921, he was married for more than 60 years to Betty (Hudacek) Meysman, and he was the

Philip Meysman Raymond Meysman

father of nine children. He passed away Nov. 8, 2006.

Raymond P. Meysman was born March 29, 1948. After graduating from Cathedral High School, he joined the U.S. Army and was a recipient of a Bronze Star. Like his father, Ray was a lifelong resident of Superior who worked for and retired from Burlington Northern Railroad.

He was also an accountant with the Meysman Accounting and Tax Service, which was owned by his father. Ray enjoyed bowling, golfing, playing cards and pool. While socializing with his friends, Ray would enjoy talking politics. Ray has a son, Cal Gould. He passed away on

Feb. 27, 2016.

The entire Meysman family is proud of Phil and Ray's service to their country and are happy to have a Flag of Remembrance flown in their memory. The flag will be raised at 9 a.m. Friday at the Richard I. Bong Veterans Historical Center, 305 Harbor View Parkway. It's free and open to the public.

Sponsored by the Richard I. Bong American Legion Post 435, the Flag of Remembrance program honors the life and memory of deceased veterans every week by flying a flag over the historical center. The flag is raised at 9 a.m. each Friday and lowered the following Friday at 8:30 a.m. Information about the veteran is on display at the center during the week.

For more information, contact John Vaski at (715) 394-7693, Scott Markle at (218) 269-4675 or the Richard I. Bong Veterans Historical Center at (715) 392-7151 or info@bvh-center.org.

The Minnesota Freight Advisory Committee invites everyone with an interest in freight to participate in an open forum in Duluth.

The forum will be an opportunity for committee members and the regional freight community to discuss the shipment of goods in and out of Northeast Minnesota. It focuses on the Duluth area transportation network, land-use plans, and how Duluth-area freight and transporta-

tion professionals work together to provide safe and efficient movement of goods.

The forum runs 9:30 a.m. to noon Sept. 8. Registration and networking will begin at 9:15 a.m. at the Inn on Lake Superior, 350 Canal Park Drive. Day parking passes will be available at the registration table for those who park in the Inn on Lake Superior's guest parking lot. RSVP online at z.umn.edu/NEFreightForum.

Utilities offer information on proposed energy center

Minnesota Power and Dairyland Power Cooperative are hosting a pair of open houses this week so the public can learn more about the planned Nemadji Trail Energy Center natural gas power plant.

Residents will have the opportunity to learn more and ask questions about the proposed 525-550 megawatt plant that will generate natural gas-powered electricity for the region.

The open houses run 11 a.m. to 1 p.m. and 5-7 p.m. Thursday at the Elks Lodge, 1503 Belknap St.

Minnesota Power, a utility division of ALLETE Inc., and Dairyland Power Cooperative announced plans in June to build the renewable-enabling Nemadji Trail Energy Center at a premier industrial site in Superior, pending regulatory approval. The Superior site for the estimated \$700 million combined-cycle power plant was selected following a Mid-

west-wide search.

The facility will employ about 22-25 people when completed and create an estimated 260 construction jobs and 130 indirect jobs. Because of its proximity to Minnesota, the facility is expected to bring benefits to both states. It is one of the single largest private investments in the area's history and is expected to provide more than \$1 billion in regional economic benefits over 20 years and generate \$1 million in annual revenue for Douglas County and the city of Superior.

"This is the next significant chapter of Minnesota Power's EnergyForward strategy, representing the largest cumulative addition to our power supply mix since 1980," said Julie Pierce, vice president of strategy and planning for Minnesota Power, who led the package development. "With these resource additions, we

continue to be a leader in the nation's transformation to provide more renewable energy, and are positioning our power supply to remain safe, reliable, cleaner and competitive for the future."

The Nemadji Trail Energy Center is a component of Dairyland Power Cooperative's and Minnesota Power's energy mix transformation. Both companies have added renewable resources to their systems to lower their carbon profiles. Natural gas supports the addition of renewable energy to the grid while providing critical backup to intermittent renewable resources, such as when the sun isn't shining and the wind isn't blowing. The two companies will share the energy produced at the plant to provide electric service to their respective customers and consumers.

Open Houses in Superior provide first look at proposed natural gas power plant

Event hosted by Minnesota Power and Dairyland Power Cooperative

Superior, WI—The public is invited to learn more about the Nemadji Trail Energy Center natural gas power plant at two upcoming open houses. Hosted by Minnesota Power and Dairyland Power Cooperative, the open houses will provide an ideal forum for residents to ask questions and receive information about the location, purpose and timeline for the project. The proposed 525-550 megawatt plant will generate natural gas-powered electricity for the region.

Public open houses:

When: Thursday, Sept. 7

11 a.m. to 1 p.m. & 5 p.m. to 7 p.m.

Where: Elks Lodge

1503 Belknap Ave., Superior Wisconsin.

Minnesota Power, a utility division of ALLETE Inc., and Dairyland Power Cooperative announced plans in June to build the renewable-enabling Nemadji Trail Energy Center at a premier industrial site in Superior, pending regulatory approval. The Superior site for the estimated \$700 million combined-cycle power plant was selected following a Midwest-wide search.

The facility will employ approximately 22-25 people when completed and create an estimated 260 construction jobs and 130 indirect jobs. Because of its proximity to Minnesota, the facility is expected to bring benefits to both states. It is one of the single largest private investments in the area's history and is estimated to provide more than \$1 billion in regional economic benefits over 20 years and generate \$1 million in annual revenue for Douglas County and the City of Superior.

The Nemadji Trail Energy Center is a key component of both Dairyland Power Cooperative's and Minnesota Power's energy mix transformation. Both companies have added renewable resources to their systems while lowering their carbon profile. Natural gas supports the addition of renewable energy to the grid while maintaining reliability by providing critical backup to intermittent renewable resources, such as when the sun isn't shining and the wind isn't blowing. The two companies will share the energy produced at the plant to provide electric service to their respective customers and consumers.

The natural gas power plant is part of Minnesota Power's recently proposed resource package that includes 250 megawatts of wind power and 10 megawatts of solar energy, both through power purchase agreements.

"This is the next significant chapter of Minnesota Power's *EnergyForward* strategy, representing the largest cumulative addition to our power supply mix since 1980," said Julie Pierce, vice president of strategy and planning for Minnesota Power, who led the package development. "With these resource additions, we

continue to be a leader in the nation's transformation to provide more renewable energy, and are positioning our power supply to remain safe, reliable, cleaner and competitive for the future."

"This project is an important component of Dairyland's ongoing *Preferred Plan* for resource diversification," says Rob Palmberg, Dairyland's Vice President, Strategic Planning. "The Nemadji Trail Energy Center will provide an agile and affordable resource that supports the major wind and solar energy investments Dairyland continues to implement. Natural gas plants provide critical back-up to intermittent renewable sources of power, like solar and wind. The Nemadji Trail Energy Center will respond on demand, providing the energy required by our membership and Minnesota Power's customers exactly when they need it."

About Minnesota Power:

Minnesota Power provides electric service within a 26,000-square-mile area in Northeastern Minnesota, supporting comfort, security and quality of life for 145,000 customers, 16 municipalities and some of the largest industrial customers in the United States.

Under its Energy *Forward* strategy, Minnesota Power has made significant strides reducing carbon on its system through the addition of renewable resources and the retirement of small coal units. Nearly 30 percent of the companies' current energy mix comes from renewable energy—a significant change from 2005 when the company was about 95 percent coal. The company's long-term goal has evolved to have a combined balance of two-thirds renewable energy and renewable-enabling natural gas and one-third environmentally compliant coal. More information is available at www.mnpower.com.

About Dairyland Power Cooperative:

Headquartered in La Crosse, Wis., Dairyland (a Touchstone Energy Cooperative) provides the wholesale electrical requirements for 24 distribution cooperatives and 17 municipal utilities. These cooperatives and municipals, in turn, supply the energy needs of more than a half-million people in the four-state service area. Dairyland delivers electricity via 3,195 miles of transmission lines and 292 substations located throughout the system's 44,500 square mile service area.

Today, Dairyland's generating resources include coal, natural gas, hydro, wind, solar and biogas. Dairyland's Preferred Plan for resource diversification is economically and systematically diversifying the cooperative's energy resources and reducing its overall carbon footprint. More information is available at www.DairylandPower.com.

Nemadji Trail Energy Center

About the Project

Minnesota Power and Dairyland Power Cooperative are proposing to build a 525-550 megawatt natural gas generation facility in Superior, Wisconsin, called the Nemadji Trail Energy Center. This center will use flexible and efficient natural gas to enable the addition of more renewable energy resources such as wind and solar, and to deliver affordable and reliable power to consumers in the region.

The image above is a rendering of the potential facility.

What is a combined-cycle natural gas plant?

This project will be a combined-cycle gas generation facility that burns natural gas in a combustion turbine (like a jet engine) to produce high-pressure, high-temperature gas that spins a turbine. This is an efficient and reliable way to produce energy while supporting growing renewable resources, minimizing emissions and increasing energy output to meet the energy needs of consumers served by Minnesota Power and Dairyland Power Cooperative.

The Nemadji Trail Energy Facility will support renewables when the wind isn't blowing and sun isn't shining.

The Facility will also:

Support customer load

Replace coal-fired generation

Reduce carbon emissions

Nemadji Trail Energy Center

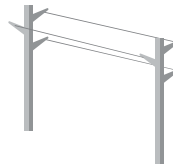

Shovel-Ready Project Site

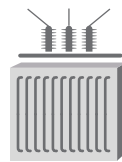

The proposed project is located in an industrial area and has access to existing electrical and natural gas infrastructure. The project will require these additional components:

Approximately seven-mile natural gas pipeline using existing right-of-way

Approximately four-mile, 345kV transmission line parallel to existing right-of-way

Approximately 10-acre substation associated with the transmission line

Anticipated Project Benefits

Largest private investment in Douglas County

Over \$1 billion in regional economic benefit over 20 years

Create 260 jobs during peak construction and up to 25 full-time permanent jobs

Approximately \$1 million in local tax benefit

Upcoming Meeting

Attend the Rural Utilities Service (RUS) Formal Scoping Meeting

September 21

4-7 pm

Elks Lodge,
Superior, WI

I'm in favor of the new power plant,
for the addition power needs for
WI and MN. Using natural gas is
very environmentally friendly and
helps lower plant emissions. I've
worked for industrial construction
companies for many years and the
construction jobs are needed in
this area.

Thank you for hosting this open house to give the citizens of this community the opportunity to learn more about the project.

I see this project as a win for the environment (converting from dirtier forms of energy ((coal))) to cleaner forms of energy.

I also see this as a big boon for the City of Superior (\$1 billion dollar project to employ 250 construction workers initially and 25 good paying jobs in the long run.)

This was a very informative open house that provided excellent perspectives on the project and its impact. I am somewhat concerned about the environmental effects and civil implications of the water resources and look forward to understanding its consequences after further study. This initial open house helps me to better understand the proposed project and is a good base to start from.
I look forward to further informational seminars.

Insight Environmental is an environmental consulting firm that specializes in Leak Detection and repair (LDAR), Optical Gas Imaging, and Unmanned Aerial Vehicle (Drone) inspections. Our emphasis is on safety and customer satisfaction. We currently serve energy neighbors at NTEC's proposed site: Calumet specialty products, Enbridge Energy, and Plains Midstream, as well as customers from Alaska to the Midwest, the gulf coast to the East coast. The jobs are all different, but the results are always the same: Zero non-compliance and customized solutions that work. It would be a pleasure to serve the new partnership with Minnesota Power and Dairyland Power.

Thank you for your time today, and
Best wishes moving forward,

Nemadji Trail Energy Center Open House Summary Series 1 September 7, 2017

THANK YOU For attending our Nemadji Trail Energy Center Open House Meetings

Minnesota Power and Dairyland Power Cooperative appreciate your participation and feedback at our Open Houses on September 7. Another open house is scheduled as part of the Rural Utilities Service scoping process related to the Nemadji Trail Energy Center. Comments and concerns addressed at this open-house will be considered as the draft Environmental Assessment (EA) is developed for the Project.

OBITUARIES

Barbara S. Stark

Barbara S. Stark, 82, of Lindstrom, MN, died Sunday, August 20, 2017, surrounded by family at Regions Hospital in St. Paul, MN.

She was born in Superior, WI on September 8, 1934, daughter of Raymond and Dorothy Bronson.

Barbara had worked at Larson's Grocery, the Douglas County Court House and raised 4 children. She loved being a Grandma and all the kids called her Wowza. She also liked: to read, having coffee and conversation with friends, playing bingo, trips to the casino, her new IPAD offered hours of game playing and Facebook, where she kept in touch with family. The Packers, Baseball and QVC were her TV highlights. Most of all, she loved the gatherings she would have with her family and friends

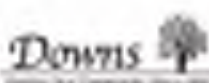

Her parents preceded her in death; Ray and Dorothy Bronson.

Barbara is survived by her sons, Michael Stark of Duluth, MN, Patrick (Karen) Stark of Superior, WI; daughters, Brenda Palm (Cordell) of Superior, and Michele (Tim) Nordahl of Chisago City, MN ; grandchildren, Michael Stark Jr., Becky Stark, Stephen Palm, Natalie Nordahl, Nichole Johnston and Samantha McDonald; her great-grandchildren; her twin sister, Betty (Jim) Fisher and her brother, William (Sandra) Bronson; many nieces, nephews, and friends.

Her visitation will be on Saturday, September 23, from 10:00 until the 11:00 a.m. memorial service at Downs Funeral Home, 1617 N 19th Street, Superior, WI.

Burial will follow at Greenwood Cemetery.

To sign the online guest book or to sign condolences, please go to www.downsfh.com

Carroll J. Evens

Age 83 of Bloomington. Preceded in death by parents Edgar and Lillian Christenson and brother Roger Christenson. Survived by loving husband of 58 years, Jack; sons Jeff (Laura) and Tim; grandchildren Jennifer and Michael. Retired employee of the Bloomington Public Schools. Active volunteer at Transfiguration Lutheran Church and Meals on Wheels. In lieu of flowers, memorials to Transfiguration Lutheran Church preferred. Funeral Service Thursday, September 14 at 11:00 AM at Transfiguration Lutheran Church,

11000 France Ave. S., Bloomington. Visitation one hour prior to service at the Church. www.WashburnMcReavy.com Werness Brothers 952-884-8145

INCOME

from Page A1

age, while the top 1 percent brought in around \$933,000 each year. Dresser said the state hasn't seen such striking levels of inequity since the Great Depression.

"We're on this upward escalator of inequality," she said. "The U.S. is more unequal than we are, but we're going right up behind it and back up to the levels that were set in 1929."

During the last three decades, the top 1 percent in the state has seen their income rise by 131 percent after adjusting for inflation. At the same time, income for the remaining 99 percent grew just 9 percent.

Eau Claire County had the highest levels of inequality with 26.2 percent of all income there going to the top 1 percent. Milwaukee and Ozaukee counties followed closely behind. Forest, Menominee and Buffalo counties had the lowest disparity, with less than 10 percent of all income there going to top earners.

The report makes sev-

eral recommendations to address income inequality, said analyst Tamara Cornelius with the Wisconsin Budget Project. She said the state can avoid a growing disparity by removing barriers to work, improving access to health care, continuing support for workforce training and increasing the minimum wage.

"Most other states have set a minimum wage that is higher than the federal minimum wage, including many states that are controlled by Republicans," she said. "It's not necessarily a partisan issue."

The National Conference of State Legislatures lists 29 states with a minimum wage higher than the federal minimum of \$7.25 per hour, including Minnesota and Michigan. Cornelius said the state should also examine making income tax rates more equal between top earners and low-income residents.

Long road ahead for Superior natural gas plant

New details shared at open house Thursday

Brooks Johnson
bjohnson@duluthnews.com

By the time the Nemadji Trail Energy Center is sending power to the grid, Emmet Christensen will be 18 years old.

"My dad works for Minnesota Power," said the aspiring engineer, now 10. "I've been excited."

Emmet was among the dozens of people who stopped by an open house in Superior on Thursday to learn more about the natural gas power plant Minnesota Power is planning with Dairyland Power Cooperative.

Though construction on the \$700 million plant won't start until 2020 at the earliest and formal permit applications won't be submitted to Wisconsin until next spring, the utilities are trying to stay ahead of what is the biggest private investment in Douglas County in re-

cent memory.

"Anytime you're talking about building a large power plant, it's a long process," said Minnesota Power spokeswoman Amy Rutledge.

A few new details were unveiled at the Superior Elks Club on Thursday, including the source of the proposed 550-megawatt plant's natural gas. A new seven-mile pipeline would be built in an existing pipeline corridor to connect to a Great Lakes Gas Transmission mainline. The new pipe likely would be 10 to 16 inches in diameter.

A 10-acre site has been identified for a new substation south of the plant at County Road Z, which would be connected by four miles of 345-kilovolt transmission lines.

The Nemadji Trail Energy Center itself would sit on the banks of the Nemadji River, nestled near the Enbridge terminal's oil tank farm. It's expected to be fully

operational in 2025.

That's the preferred plan, anyway — experts on hand acknowledged that the planning process is just beginning. An alternate site for the combined-cycle plant was identified closer to the oil refinery, and a substation could be located along North 42nd Street instead of farther south.

While slides and maps were getting set up in Superior, the Minnesota Public Utilities Commission was going through the details of Minnesota Power's power plans in St. Paul. In that audience was Leigh Currie, an environmental attorney who represents groups such as the Sierra Club that are vying to influence the process.

"A natural gas plant may not be Minnesota Power's only option," Currie wrote in an email. "The groups I represent are not necessarily opposed to this plant — if it's needed and if it's the

best option — but we want Minnesota Power to have to show its work in proving that it's the right choice before its customers are saddled with an investment of this magnitude for decades to come."

Rutledge said natural gas is needed for reliability — because the wind doesn't always blow and the sun doesn't always shine, and battery technology is far from adequate for distribution systems.

The natural gas plant is part of Minnesota Power's plans to add 250 megawatts of wind, 250 megawatts of natural gas and 10 megawatts of solar power as it continues to move away from what was almost entirely coal-based energy production as recently as 10 years ago.

Dairyland, whose member cooperatives include Bayfield Electric, is embarking on a similar plan to replace coal with cleaner fuels.

Sessions focus on helping with childhood trauma

The University of Wisconsin-Superior's Center for Continuing Education host events on becoming a more trauma-informed community where individuals can learn more about adverse childhood experiences.

The campaign starts with a free screening of the film "Resilience" at 6:30 p.m. Thursday in Swenson Hall, Room 1004 at UWS. The film uses animation and compelling characters to explore the science and the solutions to this dangerous biological syndrome. The film follows pioneering individuals who looked at the research and the emerging science of toxic stress.

The second part of the campaign, "Becoming a Trauma-Informed Community: From Adversity to Resilience - Helping without Harming," takes place 8:30 a.m. to 4:30 p.m. Sept. 23 at UWS. Adverse childhood experiences can have a life-long impact

on individuals and their families. This training is designed to help participants develop skills to effectively support individuals affected by these experiences and to build understanding and application of trauma-informed strategies community wide. Open to the community, there will be sessions geared for early childhood/family serving professionals, K-12 professionals and those in criminal justice work.

The third part of this campaign is "Bringing the Protective Factors to Life in your Work." The introduction to this segment takes place Sept. 23. The factors series will run 6-8 p.m. Oct. 10, 17, 19, 24, and 26. This course is based on the five protective factors that extensive research has shown makes families stronger, prevents child abuse and neglect, and enables families to care for children in ways that support their healthy development and well-being.

Free fall leaf tour open to seniors

Senior Connections hosts its annual Fall Leaf Tour on Oct. 3. A standard coach bus will be chartered to take seniors 60 years and older to view the fall leaves.

The route takes participants from Superior to Carlton and Wrenshall. The group will make a quick stop at "Gordy's Warming Shack" for those who wish to purchase a cup of coffee or beverage and stretch their legs, then return to Gary New Duluth on Highway 23 and home to Superior by

way of Oliver.

The trip is free, except for any purchases at Gordy's Warming Shack. Passenger pick-up will begin at 1 p.m. Pick up sites include Superior Senior Center, both Lund Hill Apartments locations, Golden Apartments, Phoenix Villa, St. Mary's Hall, Villa Rita and Grand Central Plaza.

Tour-goers can expect to return home about 4:45 p.m.

Seating is limited. Call Kim at Senior Connections at (715) 394-3611 to reserve a seat.

COUNTY

from Page A1

perior Vocations, which helps provide people with jobs.

For the last two years, the County Board has restored funding through its budget for both organizations.

Douglas County's Administration Committee

will create a new committee to create a policy for county-funded grant-making.

Doucette said the new policy wouldn't affect funding decisions for the 2018 budget but would be implemented before the 2019 budgeting process gets underway next year.

"We have to come up with a plan," said Supervisor Nick Baker.

Jed Carlson / jcarlson@superiortelegram.com

Epicurean owners, Dave Benson, left, and Tony Ciardelli, right, share a laugh with Superior Mayor Jim Paine during an open house at Epicurean in Superior on Thursday.

EPICUREAN

from Page A1

to the company's web-site, it takes about 400 milk jugs to make one of its Adirondack chairs, which are 100 percent recycled material.

In addition to adding windows at its new facility, Ciardelli said,

Epicurean's new facility eliminated a parking lot to create green space outside, and added energy and other efficiencies to its operation.

"At our old facility, we had offsite storage where we would store raw material and would truck it up every day for production," Ciardelli said. He said the new facility offers about four times the space as Hawksboot did,

which has allowed them to bring all its operations under one roof.

The additional space also has allowed for creation of a factory outlet store on site, where people can buy Epicurean cutting boards, utensils, display trays and other kitchen supplies that meet food service hygiene standards. The store is open 10 a.m. to 6 p.m. Tuesday-Saturday.

ALARMS

from Page A1

looking to do more."

The nonprofit has specifically targeted Superior and Douglas County because of fatal fires in the area over the last few years.

The Red Cross furnishes many of the smoke alarms and area businesses chip in. Flush from a recent donation of 664 smoke alarms from Enbridge, the Red Cross is seeking Douglas County homes to install them in.

Williams found out how widespread the need is when he helped install alarms in a neighbor's

house. Once they were done, he walked down the street to mention the program to others. Within two blocks, he ran into three additional neighbors who needed smoke alarms. They ranged from a young couple to retired folks, all in the middle income bracket.

One home had no working smoke detectors.

"It reminded me of the importance of getting the message out," Williams said.

For years, people have been encouraged to check their smoke alarm batteries twice a year — when the national clocks spring forward and fall behind for daylight savings time. Williams

would like folks to add another step, checking the date on the alarms.

He's also hoping that everyone who receives the free smoke alarms will pass on the word to their loved ones about the 10-year shelf life for the devices.

The Red Cross is looking for volunteers interested in helping install alarms, homes to install them in and business partners who want to donate to the cause.

"Many hands make light work," Williams said. "We know we can do more with partners than we can do on our own."

For more information, call (218) 722-0071 or visit getasmokealarm.org.

TEACHER

from Page A1

Sept. 6.

As of Monday, no for-

mal charges had been filed against the teacher by the Douglas County District Attorney's Office.

The 44-year-old educator lives in Esko,

Minn., according to Superior Police Department records.

It is Telegram policy not to name individuals until formal charges have been filed.

Clarification

A story in Friday's Telegram did not include the full scope of the damage done to a Superior sidewalk by a vandal. According to Superior Public Works Director Todd Janigo, the same person accused of drawing his name and a phallic symbol on wet concrete also walked through an entire section of wet sidewalk, leaving footprints. Janigo provided video of the damage done. The footprints were not mentioned in the criminal complaint. The Telegram apologizes for the omission.

Wis. prison system releases sex offender

The Superior Police Department announced a sex offender is scheduled to be released today.

Dean Allen Swenson, 36, was convicted of false imprisonment, strangulation and suffocation, and bail jumping in October 2015. He was convicted previously of second-degree sexual assault of a child in August 2009.

Swenson will be living in the 1600 block of North 19th Street in Superior. He is described as 5-foot-9, weighing 171 pounds with blond hair and blue eyes. He will be on GPS monitoring with the Wisconsin Department of Corrections.

For information, call the corrections field supervisor at (715) 392-7915. For an emergency, call 911.

Dean Allen Swenson

Dollar General breaks ground in Poplar

Maria Lockwood
mlockwood@superiortelegram.com

Work is underway on a new Dollar General store in the village of Poplar. The village board in July approved site plans for the project at the intersection of U.S. Highway 2 and County Highway P.

Dollar General spokeswoman Angela Petkovic said the new store is slated to open in the winter of 2018, depending on construction progress. It will employ up to 10 people.

The company places a priority on meeting

customer needs when choosing store locations, Petkovic said.

"We know convenience is a major factor in our customers' shopping decisions as we generally serve customers within a 3- to 5-mile radius, or 10-minute drive," she said.

Village board members have been aware of the incoming store for about a year as it went through the process of getting the plans approved by the state and purchasing the land, according to Village Board President Randy Jones. "It's good to see a

business coming to town although it will affect other businesses," Jones said. "Hopefully it will bring enough business to town that they won't be adversely affected."

When it opens, the Poplar site will be the third Dollar General store in Douglas County. It will join locations in Solon Springs and Superior. There is also a Dollar General store in Minong, according to the business website.

Those interested in working with the company can apply at www.dollargeneral.com/careers.

NOTICE OF PUBLIC SCOPING MEETING

DEPARTMENT OF AGRICULTURE Rural Utilities Service

Dairyland Power Cooperative: Notice of Intent to Prepare an Environmental Assessment and Hold a Public Scoping Meeting
AGENCY: Rural Utilities Service, USDA

An Alternative Evaluation Study (AES) and Site Selection Study, prepared by Dairyland Power Cooperative, will be presented at a public scoping meeting. The reports are available for public review at the RUS address provided in this notice and at Dairyland Power Cooperative, 3200 East Avenue, South, La Crosse, WI 54602.

In addition, the reports will be available at RUS' Web site, <http://www.rd.usda.gov/publications/environmental-studies/impact-statements> and at local libraries in the project area.

NOTICE
Notice of Intent to Prepare an Environmental Assessment and Hold a Public Scoping Meeting.

SUMMARY
The Rural Utilities Service (RUS) intends to prepare an Environmental Assessment (EA) and hold a public scoping meeting in connection with possible impacts related to the Nemaaji Trail Energy Center (NTEC) Project, proposed by Dairyland Power Cooperative (DPC). The other utility company participating in the Project is Minnesota Power LLC, by its corporate manager the Allele Company Inc.

The proposal consists of the construction of a 525-550 megawatt natural gas generation facility. Both the proposed and alternate project locations are in Superior, Wisconsin. The Project includes a new four-mile transmission line and substation to connect it to the transmission grid, as well as a seven-mile natural gas line to connect it to the two nearby interstate gas pipelines. DPC and the other project participant have identified primary and alternate locations for transmission lines, the substation, and associated facilities. Dairyland Power Cooperative is requesting RUS to provide financing for its portion of the proposed project.

DATES
RUS will conduct one public scoping meeting in an open-house format at the following location:

Date: September 21, 2017
Time: 4:00 p.m. to 7:00 p.m.
Location: Elks Lodge Superior, WI No. 403
1503 Belknap St
Superior, WI 54880-2647

SUPPLEMENTAL INFORMATION
NTEC will be a combined-cycle gas generation facility that burns natural gas in a combustion turbine to produce high-pressure, high-temperature gas that spins a turbine. It will be 60% less carbon intensive than traditional energy sources and is intended by the project partners to enable additional renewable resources to be added to both systems.

The proposed project site and alternative site are construction-ready; the project schedule proposes that engineering and construction begin in 2020 to make the plant operational by 2025.

RUS will use input provided by government agencies, private organizations, and the public in the preparation of the Environmental Assessment. The Environmental Assessment review will result in either a Finding of No Significant Impact (FONSI), or if necessary, an Environmental Impact Statement (EIS).

If an EIS is created, the draft will be available for review and comment for 45 days. A Final EIS that considers all comments received will subsequently be prepared. The Final EIS will be available for review and comment for 30 days. Following the 30-day comment period, RUS will prepare a Record of Decision (ROD). Notices announcing the availability of the Draft EIS, the Final EIS, and the ROD will be published in the Federal Register and in local newspapers. Any final action by RUS related to the proposed project will be subject to, and contingent upon, compliance with all relevant federal, state, and local environmental laws and regulations and completion of the environmental review requirements as prescribed in the RUS Environmental Policies and Procedures (7 CFR part 1970).

NOTICE OF PUBLIC SCOPING MEETING

DEPARTMENT OF AGRICULTURE Rural Utilities Service

Dairyland Power Cooperative: Notice of Intent to Prepare an Environmental Assessment and Hold a Public Scoping Meeting
AGENCY: Rural Utilities Service, USDA

An Alternative Evaluation Study (AES) and Site Selection Study, prepared by Dairyland Power Cooperative, will be presented at a public scoping meeting. The reports are available for public review at the RUS address provided in this notice and at Dairyland Power Cooperative, 3200 East Avenue, South, La Crosse, WI 54602.

In addition, the reports will be available at RUS' Web site, <http://www.rd.usda.gov/publications/environmental-studies/impact-statements> and at local libraries in the project area.

NOTICE
Notice of Intent to Prepare an Environmental Assessment and Hold a Public Scoping Meeting.

SUMMARY
The Rural Utilities Service (RUS) intends to prepare an Environmental Assessment (EA) and hold a public scoping meeting in connection with possible impacts related to the Nemaaji Trail Energy Center (NTEC) Project, proposed by Dairyland Power Cooperative (DPC). The other utility company participating in the Project is Minnesota Power LLC, by its corporate manager the Allele Company Inc.

The proposal consists of the construction of a 525-550 megawatt natural gas generation facility. Both the proposed and alternate project locations are in Superior, Wisconsin. The Project includes a new four-mile transmission line and substation to connect it to the transmission grid, as well as a seven-mile natural gas line to connect it to the two nearby interstate gas pipelines. DPC and the other project participant have identified primary and alternate locations for transmission lines, the substation, and associated facilities. Dairyland Power Cooperative is requesting RUS to provide financing for its portion of the proposed project.

DATES
RUS will conduct one public scoping meeting in an open-house format at the following location:

Date: September 21, 2017
Time: 4:00 p.m. to 7:00 p.m.
Location: Elks Lodge Superior, WI No. 403
1503 Belknap St
Superior, WI 54880-2647

SUPPLEMENTAL INFORMATION
NTEC will be a combined-cycle gas generation facility that burns natural gas in a combustion turbine to produce high-pressure, high-temperature gas that spins a turbine. It will be 60% less carbon intensive than traditional energy sources and is intended by the project partners to enable additional renewable resources to be added to both systems.

The proposed project site and alternative site are construction-ready; the project schedule proposes that engineering and construction begin in 2020 to make the plant operational by 2025.

RUS will use input provided by government agencies, private organizations, and the public in the preparation of the Environmental Assessment. The Environmental Assessment review will result in either a Finding of No Significant Impact (FONSI), or if necessary, an Environmental Impact Statement (EIS).

If an EIS is created, the draft will be available for review and comment for 45 days. A Final EIS that considers all comments received will subsequently be prepared. The Final EIS will be available for review and comment for 30 days. Following the 30-day comment period, RUS will prepare a Record of Decision (ROD). DOUGLAS COUNTY REAL ESTATE SALE

Separate sealed bids will be received by to 1:00 p.m., on Tuesday, September 3, 2017, in the County Clerk's Office. Bids will be opened that date, at 3:00 p.m., in the **Douglas County Courthouse, Room 207C, 1313 Belknap Street**, on each parcel of land described below. Note: Legal descriptions may be abbreviated.

CONDITIONS OF BID/SALE

The following applies to all Douglas County land bids and sales: (1) Bids must be made on an official bid blank, which can be obtained at the County Clerk's Office; (2) No bid will be accepted for less than the minimum bid amount of the parcel (except for previously advertised property), and full amount of bid must accompany each bid in the form of a certified cashier's check or money order made payable to Douglas County Clerk. Douglas County reserves the right to reject any and all bids or to award the bid most advantageous to Douglas County; (3) Bids are awarded based on the following criteria: (a) Dollar value; (b) Prospective use of property; (c) Prior ownership; (d) Adjacent property ownership; (e) Taxability of property upon transfer; (f) Build ability under present zoning codes; (g) Access; (h) Delinquent real estate taxes owed by bidder; and (i) Any other criteria the Land and Development Committee wishes to consider to evaluate any bid; (4) All mineral rights are reserved by Douglas County; (5) It is the responsibility of the bidder to: (a) Determine whether the proposed use of the property is in compliance with all zoning ordinances and wetland laws and all other county or municipal ordinances pertaining to property management and use. Douglas County does not guarantee that a proposed use will be allowable; and (b) Obtain access into landlocked property. Section 80.13 of the Wisconsin Statutes governs land shut out from public highway. Douglas County does not guarantee access; (6) All bids are final. Any request to withdraw a bid must be made to the Land and Development Committee, with sufficient reason. A withdrawal penalty of 10% of the bid amount (minimum \$100.00; maximum \$2,000.00) will be retained by the county; (7) Douglas County will transfer title by Quit Claim Deed, which is intended to pass any title, interest, or claim which Douglas County may have in the property, but does not warrant clear title; (8) Certain City of Superior properties may have stormwater utility fees and or sewage fees owing at the time of purchase and these will become the responsibility of the new owner; (9) All sales are final; and (10) Purchaser is responsible for any current year real estate taxes or special assessments that may be owed and not paid against the subject property. Note: Any maps of parcels provided by the Douglas County Clerk's Office are for illustration purposes only, and may not accurately reflect the actual legal boundaries of a parcel.

IMPROVED CITY PROPERTY

PARCEL 18-17: Lot 3, Block 179, except North 6 Feet of West 20 Feet, West Superior 6th Division, City of Superior, 1705 Banks Avenue. Zoned: R3 Apartment Residential. Minimum Bid Amount \$10,000.00. Contact City of Superior Building Inspection Office for building code compliance status. (07-807-00255-00)

PREVIOUSLY ADVERTISED PROPERTY

The following parcels were previously advertised at the amount indicated, with no bids received. The Land Committee will consider a bid that is less than the minimum bid amount. **As a general practice, the committee will not consider a bid that is less than 75% of that amount. However, the committee reserves the right to accept any bid if the proposed use and/or development of the property is deemed desirable and advantageous to the county.** Bids are to be submitted as set out above.

IMPROVED PROPERTIES

PARCEL 14-17: Lots 157 and 159, Townsite of Superior West 3rd Street, City of Superior, 2601 E 3rd Street. Zoned: R1B Family Residential. Minimum Bid Amount \$25,000.00. (01-801-00921-00) Contact City of Superior Building Inspection Office for building code compliance status.

PARCEL 15-17: Lot 11, Block 391, West Superior 17th Division, City of Superior, 1921 Iowa Avenue. Zoned: R1B - 1 Family Residential B. Minimum Bid Amount \$7,500.00. (09-809-00868-00)

UNIMPROVED PROPERTY

PARCEL 31-14: Lots 242, 244, and 246, West 5th Street, Townsite of Superior, City of Superior, 2312-2314 E 5th Street. Zoned: C2 Highway Commercial District. Minimum Bid Amount \$5,500.00. (01-801-01524-00)

NOTICE OF PUBLIC SCOPING MEETING

DEPARTMENT OF AGRICULTURE Rural Utilities Service

Dairyland Power Cooperative: Notice of Intent to Prepare an Environmental Assessment and Hold a Public Scoping Meeting

AGENCY: Rural Utilities Service, USDA

An Alternative Evaluation Study (AES) and Site Selection Study, prepared by Dairyland Power Cooperative, will be presented at a public scoping meeting. The reports are available for public review at the RUS address provided in this notice and at Dairyland Power Cooperative, 3200 East Avenue, South, La Crosse, WI 54602.

In addition, the reports will be available at RUS' Web site, <http://www.rd.usda.gov/publications/environmental-studies/impact-statements> and at local libraries in the project area.

AGENCY: Rural Utilities Service, USDA

NOTICE

Notice of Intent to Prepare an Environmental Assessment and Hold a Public Scoping Meeting.

SUMMARY

The Rural Utilities Service (RUS) intends to prepare an Environmental Assessment (EA) and hold a public scoping meeting in connection with possible impacts related to the Nemadji Trail Energy Center (NTEC) Project, proposed by Dairyland Power Cooperative (DPC). The other utility company participating in the Project is Minnesota Power LLC, by its corporate manager the Allele Company Inc.

The proposal consists of the construction of a 525-550 megawatt natural gas generation facility. Both the proposed and alternate project locations are in Superior, Wisconsin. The Project includes a new four-mile transmission line and substation to connect it to the transmission grid, as well as a seven-mile natural gas line to connect it to the two nearby interstate gas pipelines. DPC and the other project participant have identified primary and alternate locations for transmission lines, the substation, and associated facilities. Dairyland Power Cooperative is requesting RUS to provide financing for its portion of the proposed project.

DATES

RUS will conduct one public scoping meeting in an open-house format at the following location:

Date: September 21, 2017
Time: 4:00 p.m. to 7:00 p.m.
Location: Elks Lodge Superior, WI No. 403
1503 Belknap St
Superior, WI 54880-2647

SUPPLEMENTAL INFORMATION

NTEC will be a combined-cycle gas generation facility that burns natural gas in a combustion turbine to produce high-pressure, high-temperature gas that spins a turbine. It will be 60% less carbon intensive than traditional energy sources and is intended by the project partners to enable additional renewable resources to be added to both systems.

The proposed project site and alternative site are construction-ready; the project schedule proposes that engineering and construction begin in 2020 to make the plant operational by 2025.

RUS will use input provided by government agencies, private organizations, and the public in the preparation of the Environmental Assessment. The Environmental Assessment review will result in either a Finding of No Significant Impact (FONSI), or if necessary, an Environmental Impact Statement (EIS).

If an EIS is created, the draft will be available for review and comment for 45 days. A Final EIS that considers all comments received will subsequently be prepared. The Final EIS will be available for review and comment for 30 days. Following the 30-day comment period, RUS will prepare a Record of Decision (ROD). Notices announcing the availability of the Draft EIS, the Final EIS, and the ROD will be published in the Federal Register and in local newspapers. Any final action by RUS related to the proposed project will be subject to, and contingent upon, compliance with all relevant federal, state, and local environmental laws and regulations and completion of the environmental review requirements as prescribed in the RUS Environmental Policies and Procedures (7 CFR part 1970).

NOTICE OF PUBLIC SCOPING MEETING

DEPARTMENT OF AGRICULTURE Rural Utilities Service

Dairyland Power Cooperative: Notice of Intent to Prepare an Environmental Assessment and Hold a Public Scoping Meeting

AGENCY: Rural Utilities Service, USDA

An Alternative Evaluation Study (AES) and Site Selection Study, prepared by Dairyland Power Cooperative, will be presented at a public scoping meeting. The reports are available for public review at the RUS address provided in this notice and at Dairyland Power Cooperative, 3200 East Avenue, South, La Crosse, WI 54602.

In addition, the reports will be available at RUS' Web site, <http://www.rd.usda.gov/publications/environmental-studies/impact-statements> and at local libraries in the project area.

AGENCY: Rural Utilities Service, USDA

NOTICE

Notice of Intent to Prepare an Environmental Assessment and Hold a Public Scoping Meeting.

SUMMARY

The Rural Utilities Service (RUS) intends to prepare an Environmental Assessment (EA) and hold a public scoping meeting in connection with possible impacts related to the Nemadji Trail Energy Center (NTEC) Project, proposed by Dairyland Power Cooperative (DPC). The other utility company participating in the Project is Minnesota Power LLC, by its corporate manager the Allele Company Inc.

The proposal consists of the construction of a 525-550 megawatt natural gas generation facility. Both the proposed and alternate project locations are in Superior, Wisconsin. The Project includes a new four-mile transmission line and substation to connect it to the transmission grid, as well as a seven-mile natural gas line to connect it to the two nearby interstate gas pipelines. DPC and the other project participant have identified primary and alternate locations for transmission lines, the substation, and associated facilities. Dairyland Power Cooperative is requesting RUS to provide financing for its portion of the proposed project.

DATES

RUS will conduct one public scoping meeting in an open-house format at the following location:

Date: September 21, 2017
Time: 4:00 p.m. to 7:00 p.m.
Location: Elks Lodge Superior, WI No. 403
1503 Belknap St
Superior, WI 54880-2647

SUPPLEMENTAL INFORMATION

NTEC will be a combined-cycle gas generation facility that burns natural gas in a combustion turbine to produce high-pressure, high-temperature gas that spins a turbine. It will be 60% less carbon intensive than traditional energy sources and is intended by the project partners to enable additional renewable resources to be added to both systems.

The proposed project site and alternative site are construction-ready; the project schedule proposes that engineering and construction begin in 2020 to make the plant operational by 2025.

RUS will use input provided by government agencies, private organizations, and the public in the preparation of the Environmental Assessment. The Environmental Assessment review will result in either a Finding of No Significant Impact (FONSI), or if necessary, an Environmental Impact Statement (EIS).

If an EIS is created, the draft will be available for review and comment for 45 days. A Final EIS that considers all comments received will subsequently be prepared. The Final EIS will be available for review and comment for 30 days. Following the 30-day comment period, RUS will prepare a Record of Decision (ROD). Notices announcing the availability of the Draft EIS, the Final EIS, and the ROD will be published in the Federal Register and in local newspapers. Any final action by RUS related to the proposed project will be subject to, and contingent upon, compliance with all relevant federal, state, and local environmental laws and regulations and completion of the environmental review requirements as prescribed in the RUS Environmental Policies and Procedures (7 CFR part 1970).

DOUGLAS COUNTY REAL ESTATE SALE

Separate sealed bids will be received by to 1:00 p.m., on Tuesday, September 3, 2017, in the County Clerk's Office. Bids will be opened that date, at 3:00 p.m., in the **Douglas County Courthouse, Room 207C, 1313 Belknap Street**, on each parcel of land described below. Note: Legal descriptions may be abbreviated.

CONDITIONS OF BID/SALE

The following applies to all Douglas County land bids and sales: (1) Bids must be made on an official bid blank, which can be obtained at the County Clerk's Office; (2) No bid will be accepted for less than the minimum bid amount of the parcel (except for previously advertised property), and full amount of bid must accompany each bid in the form of a certified cashier's check or money order made payable to Douglas County Clerk. Douglas County reserves the right to reject any and all bids or to award the bid most advantageous to Douglas County; (3) Bids are awarded based on the following criteria: (a) Dollar value; (b) Prospective use of property; (c) Prior ownership; (d) Adjacent property ownership; (e) Taxability of property upon transfer; (f) Build ability under present zoning codes; (g) Access; (h) Delinquent real estate taxes owed by bidder; and (i) Any other criteria the Land and Development Committee wishes to consider to evaluate any bid; (4) All mineral rights are reserved by Douglas County; (5) It is the responsibility of the bidder to: (a) Determine whether the proposed use of the property is in compliance with all zoning ordinances and wetland laws and all other county or municipal ordinances pertaining to property management and use. Douglas County does not guarantee that a proposed use will be allowable; and (b) Obtain access into landlocked property. Section 80.13 of the Wisconsin Statutes governs land shut out from public highway. Douglas County does not guarantee access; (6) All bids are final. Any request to withdraw a bid must be made to the Land and Development Committee, with sufficient reason. A withdrawal penalty of 10% of the bid amount (minimum \$100.00; maximum \$2,000.00) will be retained by the county; (7) Douglas County will transfer title by Quit Claim Deed, which is intended to pass any title, interest, or claim which Douglas County may have in the property, but does not warrant clear title; (8) Certain City of Superior properties may have stormwater utility fees and or sewage fees owing at the time of purchase and these will become the responsibility of the new owner; (9) All sales are final; and (10) Purchaser is responsible for any current year real estate taxes or special assessments that may be owed and not paid against the subject property. Note: Any maps of parcels provided by the Douglas County Clerk's Office are for illustration purposes only, and may not accurately reflect the actual legal boundaries of a parcel.

IMPROVED CITY PROPERTY

PARCEL 18-17: Lot 3, Block 179, except North 6 Feet of West 20 Feet, West Superior 6th Division, City of Superior, 1705 Banks Avenue. Zoned: R3 Apartment Residential. Minimum Bid Amount \$10,000.00. Contact City of Superior Building Inspection Office for building code compliance status. (07-807-00255-00)

PREVIOUSLY ADVERTISED PROPERTY

The following parcels were previously advertised at the amount indicated, with no bids received. The Land Committee will consider a bid that is less than the minimum bid amount. **As a general practice, the committee will not consider a bid that is less than 75% of that amount. However, the committee reserves the right to accept any bid if the proposed use and/or development of the property is deemed desirable and advantageous to the county.** Bids are to be submitted as set out above.

IMPROVED PROPERTIES

PARCEL 14-17: Lots 157 and 159, Townsite of Superior West 3rd Street, City of Superior, 2601 E 3rd Street. Zoned: R1B Family Residential. Minimum Bid Amount \$25,000.00. (01-801-00921-00) Contact City of Superior Building Inspection Office for building code compliance status.

NOTICE OF PUBLIC SCOPING MEETING

DEPARTMENT OF AGRICULTURE Rural Utilities Service
Dairyland Power Cooperative: Notice of Intent to Prepare an Environmental Assessment and Hold a Public Scoping Meeting
AGENCY: Rural Utilities Service, USDA

An Alternative Evaluation Study (AES) and Site Selection Study, prepared by Dairyland Power Cooperative, will be presented at a public scoping meeting. The reports are available for public review at the RUS address provided in this notice and at Dairyland Power Cooperative, 3200 East Avenue, South, La Crosse, WI 54602.
In addition, the reports will be available at RUS' Web site, <http://www.rd.usda.gov/publications/environmental-studies/impact-statements> and at local libraries in the project area.

ACTION
Notice of Intent to Prepare an Environmental Assessment and Hold a Public Scoping Meeting.

SUMMARY
The Rural Utilities Service (RUS) intends to prepare an Environmental Assessment (EA) and hold a public scoping meeting in connection with possible impacts related to the Nemadji Trail Energy Center (NTEC) project, proposed by Dairyland Power Cooperative (DPC). The other utility company participating in the Project is Minnesota Power LLC, by its corporate manager the Allete Company Inc.

The proposal consists of the construction of a 525-550 megawatt natural gas generation facility. Both the proposed and alternate project locations are in Superior, Wisconsin. The Project includes a new four-mile transmission line and substation to connect it to the transmission grid, as well as a seven-mile natural gas line to connect it to the two nearby interstate gas pipelines. DPC and the other project participant have identified primary and alternate locations for transmission lines, the substation, and associated facilities. Dairyland Power Cooperative is requesting RUS to provide financing for its portion of the proposed project.

DATES
RUS will conduct one public scoping meeting in an open-house format at the following location:
Date: September 21, 2017
Time: 4:00 p.m. to 7:00 p.m.
Location: Elks Lodge Superior, WI No. 403
1503 Belknap St
Superior, WI 54880-2647

SUPPLEMENTAL INFORMATION
NTEC will be a combined-cycle gas generation facility that burns natural gas in a combustion turbine to produce high-pressure, high-temperature gas that spins a turbine. It will be 60% less carbon intensive than traditional energy sources and is intended by the project partners to enable additional renewable resources to be added to both systems.

The proposed project site and alternative site are construction-ready; the project schedule proposes that engineering and construction begin in 2020 to make the plant operational by 2025.

RUS will use input provided by government agencies, private organizations, and the public in the preparation of the Environmental Assessment. The Environmental Assessment review will result in either a Finding of No Significant Impact (FONSI), or if necessary, an Environmental Impact Statement (EIS).

If an EIS is created, the draft will be available for review and comment for 45 days. A Final EIS that considers all comments received will subsequently be prepared. The Final EIS will be available for review and comment for 30 days. Following the 30-day comment period, RUS will prepare a Record of Decision (ROD). Notices announcing the availability of the Draft EIS, the Final EIS, and the ROD will be published in the Federal Register and in local newspapers. Any final action by RUS related to the proposed project will be subject to, and contingent upon, compliance with all relevant federal, state, and local environmental laws and regulations and completion of the environmental review requirements as prescribed in the RUS Environmental Policies and Procedures (7 CFR part 1970).

WHO IS USDA- RURAL UTILITIES SERVICE?

The Rural Utilities Service (formerly REA, the Rural Electrification Administration), as part of the U.S. Department of Agriculture (USDA), is committed to helping improve the economy and quality of life in rural America.

USDA Funding

USDA provides funding opportunities for the development and commercialization of vital utility services. These funding opportunities include:

Payments

Grants

Loans

Loan Guarantees

These financial programs support essential public facilities and services. These investments support our long-term national prosperity by ensuring that rural communities have the basic infrastructure to become self-sustaining with the ability to compete in the global economy.

Providing electricity is essential to the economic well-being and quality of life for all of the nation's rural residents. The Electric Programs provide leadership and capital to upgrade, expand, maintain, and replace America's vast rural electric infrastructure. Under the authority of the Rural Electrification Act of 1936, the Electric Programs make direct loans and loan guarantees to electric utilities to serve customers in rural areas. Through the Electric Programs, the Federal government is the majority noteholder for approximately 700 electric systems borrowers in 46 states.

Nemadji Trail Energy Center

About the Project

Minnesota Power and Dairyland Power Cooperative are proposing to build a 525-550 megawatt natural gas generation facility in Superior, Wisconsin, called the Nemadji Trail Energy Center. This center will use flexible and efficient natural gas to enable the addition of more renewable energy resources such as wind and solar, and to deliver affordable and reliable power to consumers in the region.

The image above is a rendering of the potential facility.

What is a combined-cycle natural gas plant?

This project will be a combined-cycle gas generation facility that burns natural gas in a combustion turbine (like a jet engine) to produce high-pressure, high-temperature gas that spins a turbine. This is an efficient and reliable way to produce energy while supporting growing renewable resources, minimizing emissions and increasing energy output to meet the energy needs of consumers served by Minnesota Power and Dairyland Power Cooperative.

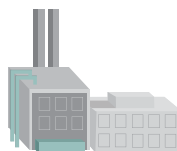

The Nemadji Trail Energy Facility will support renewables when the wind isn't blowing and sun isn't shining.

The Facility will also:

Support customer load

Replace coal-fired generation

Reduce carbon emissions

Nemadji Trail Energy Center

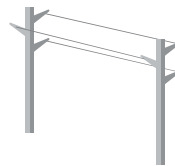

Shovel-Ready Project Site

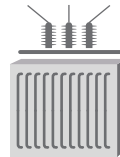

The proposed project is located in an industrial area and has access to existing electrical and natural gas infrastructure. The project will require these additional components:

Approximately seven-mile natural gas pipeline using existing right-of-way

Approximately four-mile, 345kV transmission line parallel to existing right-of-way

Approximately 10-acre substation associated with the transmission line

Anticipated Project Benefits

Largest private investment in Douglas County

Over \$1 billion in regional economic benefit over 20 years

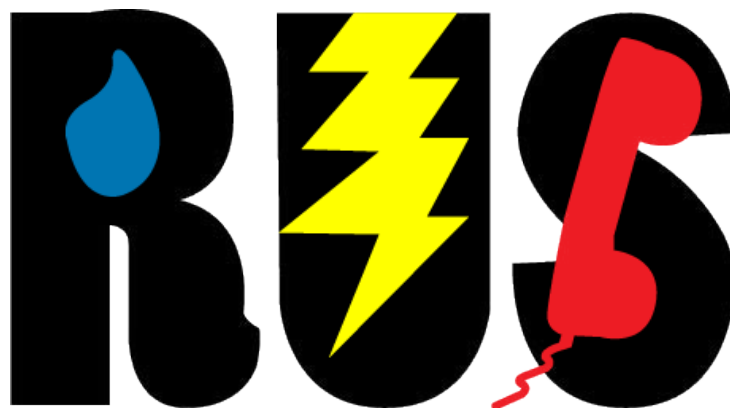

Create 260 jobs during peak construction and up to 25 full-time permanent jobs

Approximately \$1 million in local tax benefit

We Are Here

PUBLIC WORKSHOP

A public workshop is an opportunity to provide feedback and ask questions about the project.

DRAFT ENVIRONMENTAL ASSESSMENT

A draft environmental assessment (EA) reviews the potential effects a project might have on human and natural resources.

PUBLIC COMMENT PERIOD

After the draft EA is published, the public is allowed to comment on if the EA appropriately analyzed potential effects.

FINAL ENVIRONMENTAL ASSESSMENT

The Rural Utilities Service (RUS) will review and consider all comments received on the EA and modify the document before publishing a Final EA.

RUS will either make a decision that they can sign a **Finding of No Significant Impact** or proceed with an **Environmental Impact Statement (EIS)**.

In the Environmental Assessment (EA) the Rural Utilities Service (RUS) will evaluate the project's potential effects on environmental resources, such as:

✓ Geology & Soils

✓ Vegetation

✓ Wildlife

✓ Special Status
Species

✓ Cultural & Historic
Resources

✓ Farmland

✓ Wetlands

✓ Surface &
Ground Water

✓ Floodplains

✓ Water Resources

✓ Air Quality

✓ Visual Resources

✓ Land Use

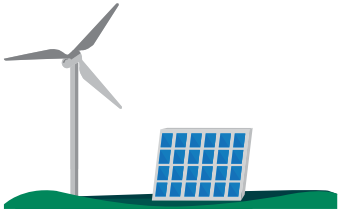

✓ Transportation

✓ Socioeconomics

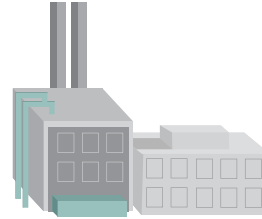

✓ Environmental
Justice

✓ Health & Safety

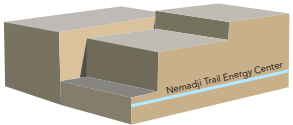

✓ Noise

Enable renewable energy

Replace recently retired generation facilities

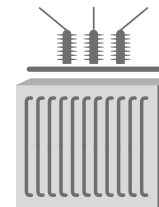

Add new generating capacity to the current resource mix

Ensure reliability and resource adequacy during unforeseen events

Support customer load

Secure capacity and energy resources

Nemadji Trail Energy Center

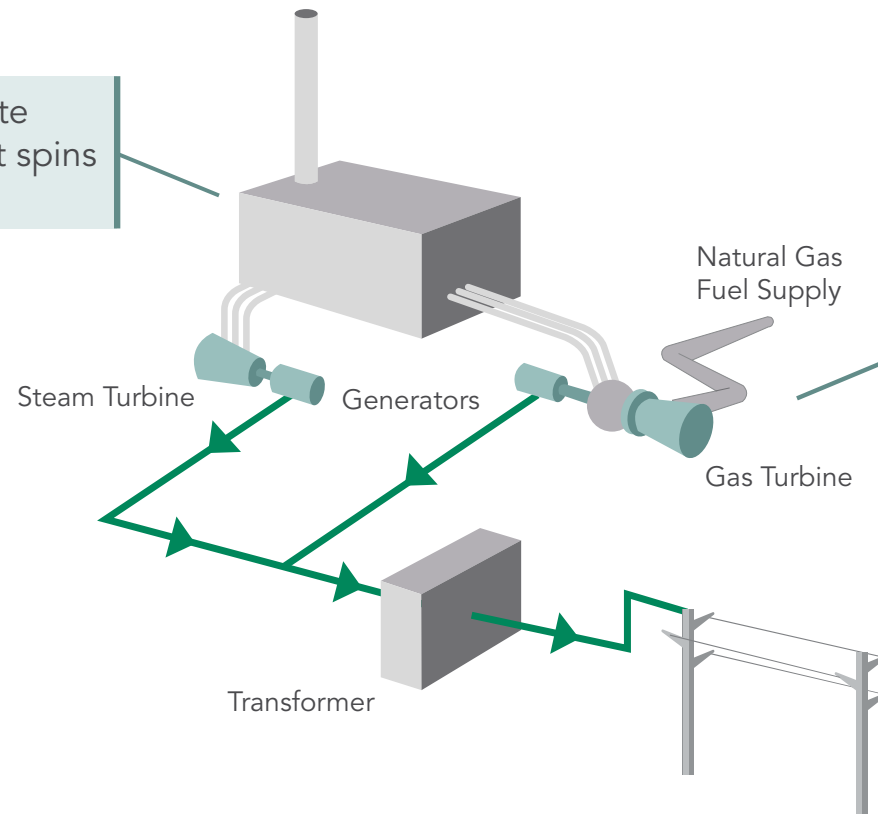

COMBINED-CYCLE NATURAL GAS PLANT

The Nemadji Trail Energy Center will generate 525-550 megawatts.

1 megawatt powers ~1,000 homes.

This facility captures waste heat to create steam that spins a second turbine.

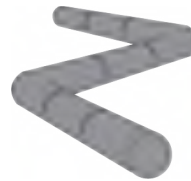

Natural gas is burned to produce high-pressure, high-temperature gas that spins a turbine.

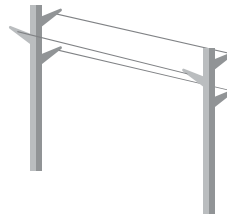

Energy from the turbines flows to a transformer and continues through the electric grid to power homes and businesses.

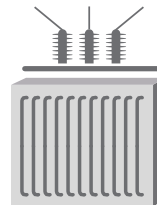

The proposed project is located in an industrial area and has access to existing electrical and natural gas infrastructure. The project will require these additional components:

Approximately seven-mile natural gas pipeline using existing right-of-way

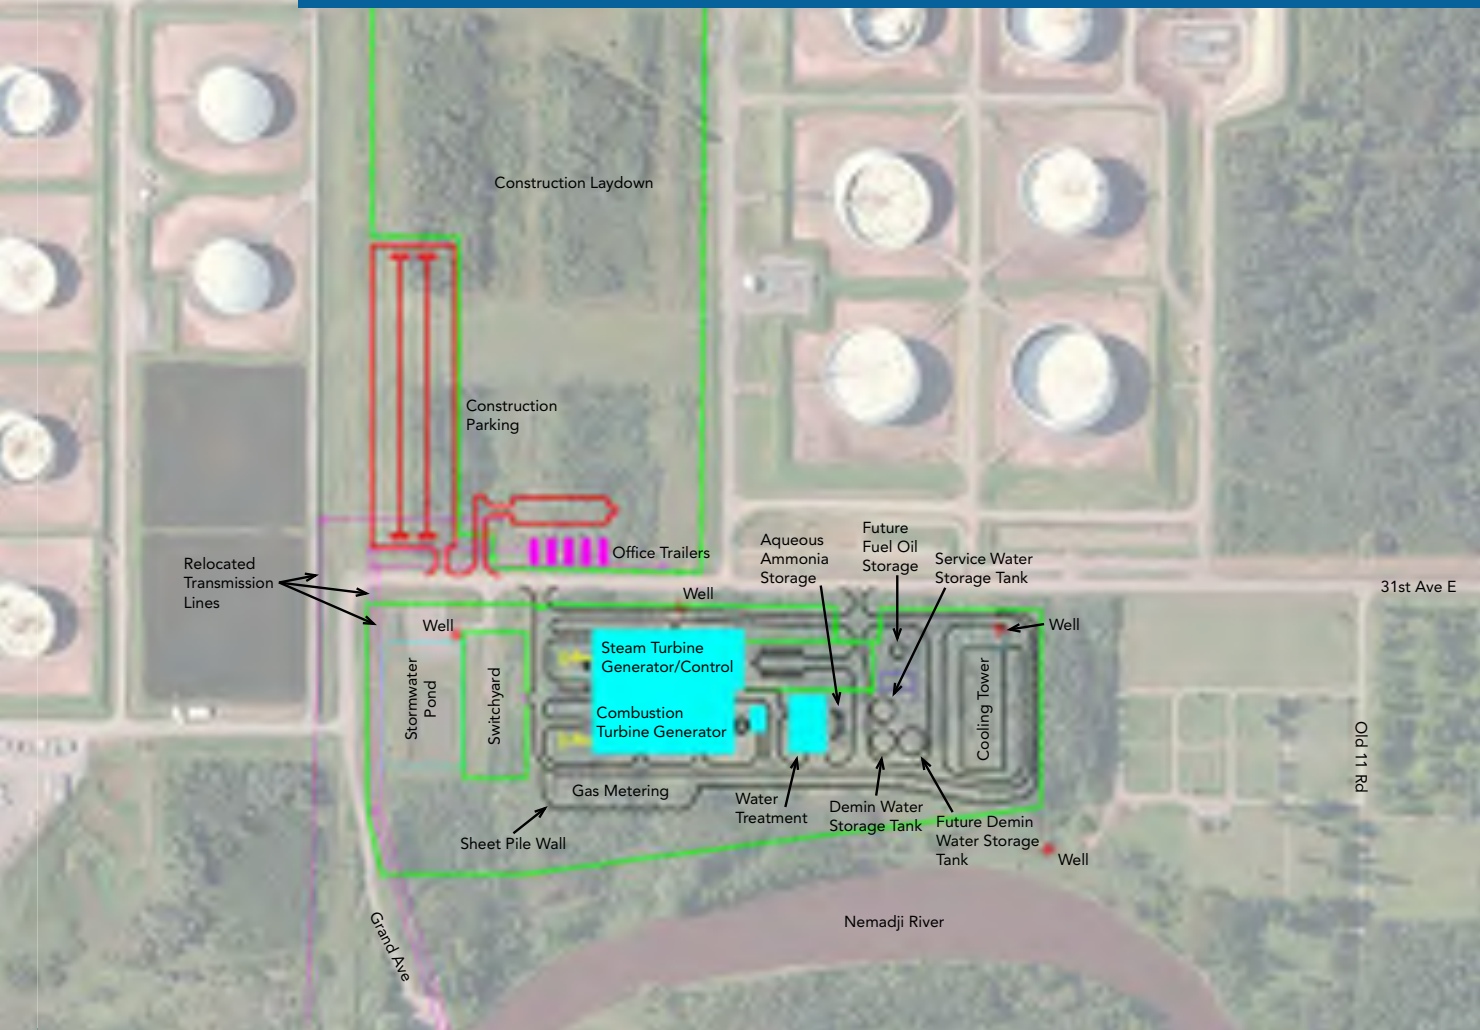

Approximately four-mile, 345kV transmission line parallel to existing right-of-way

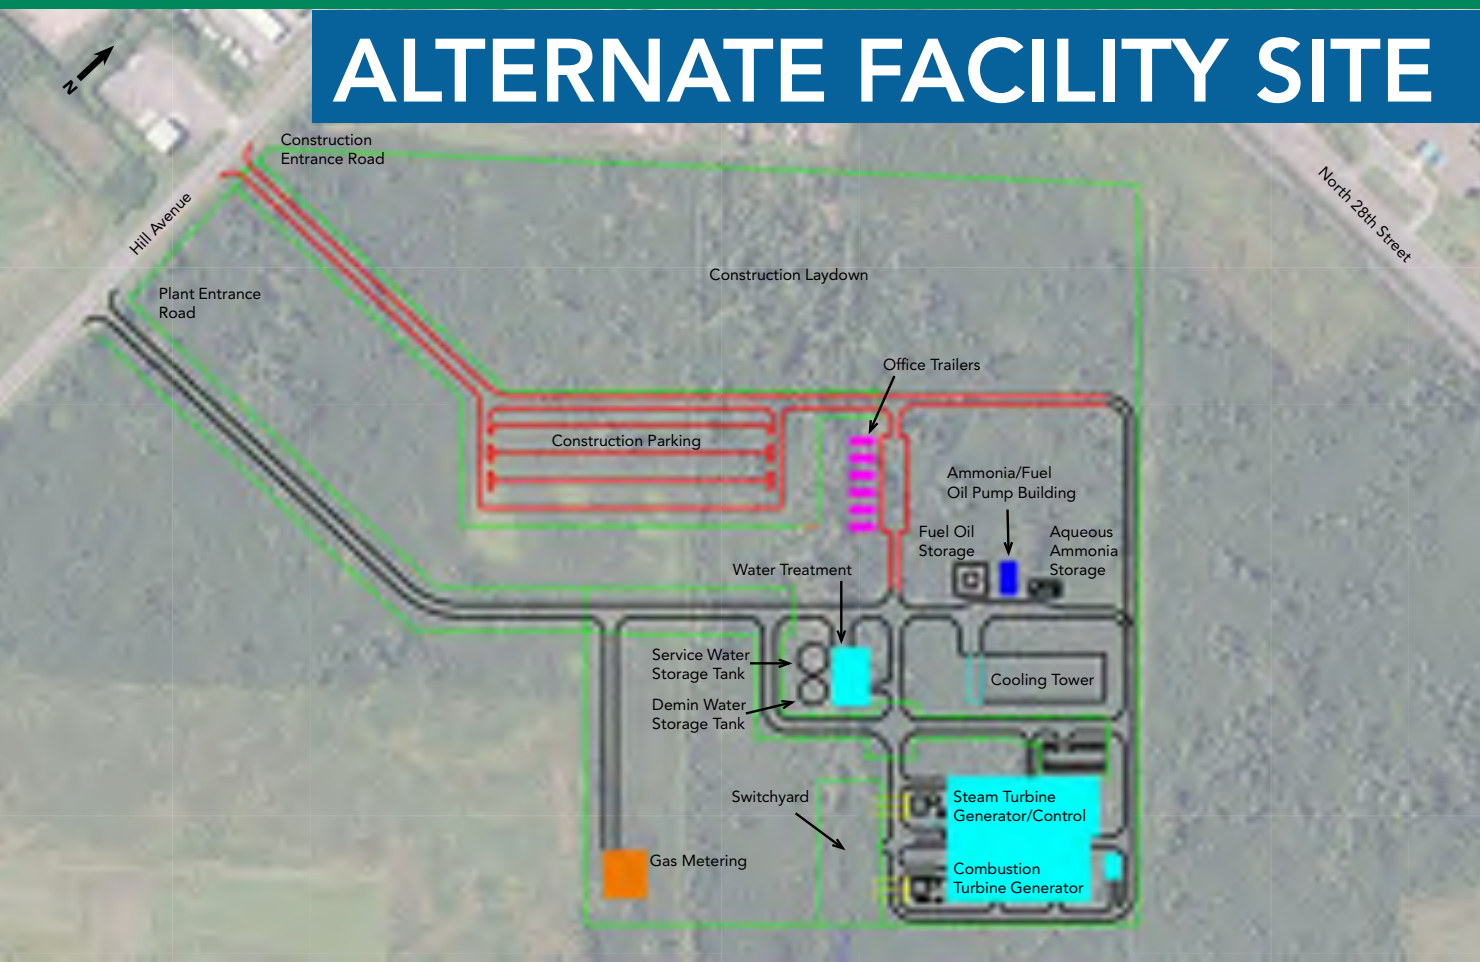

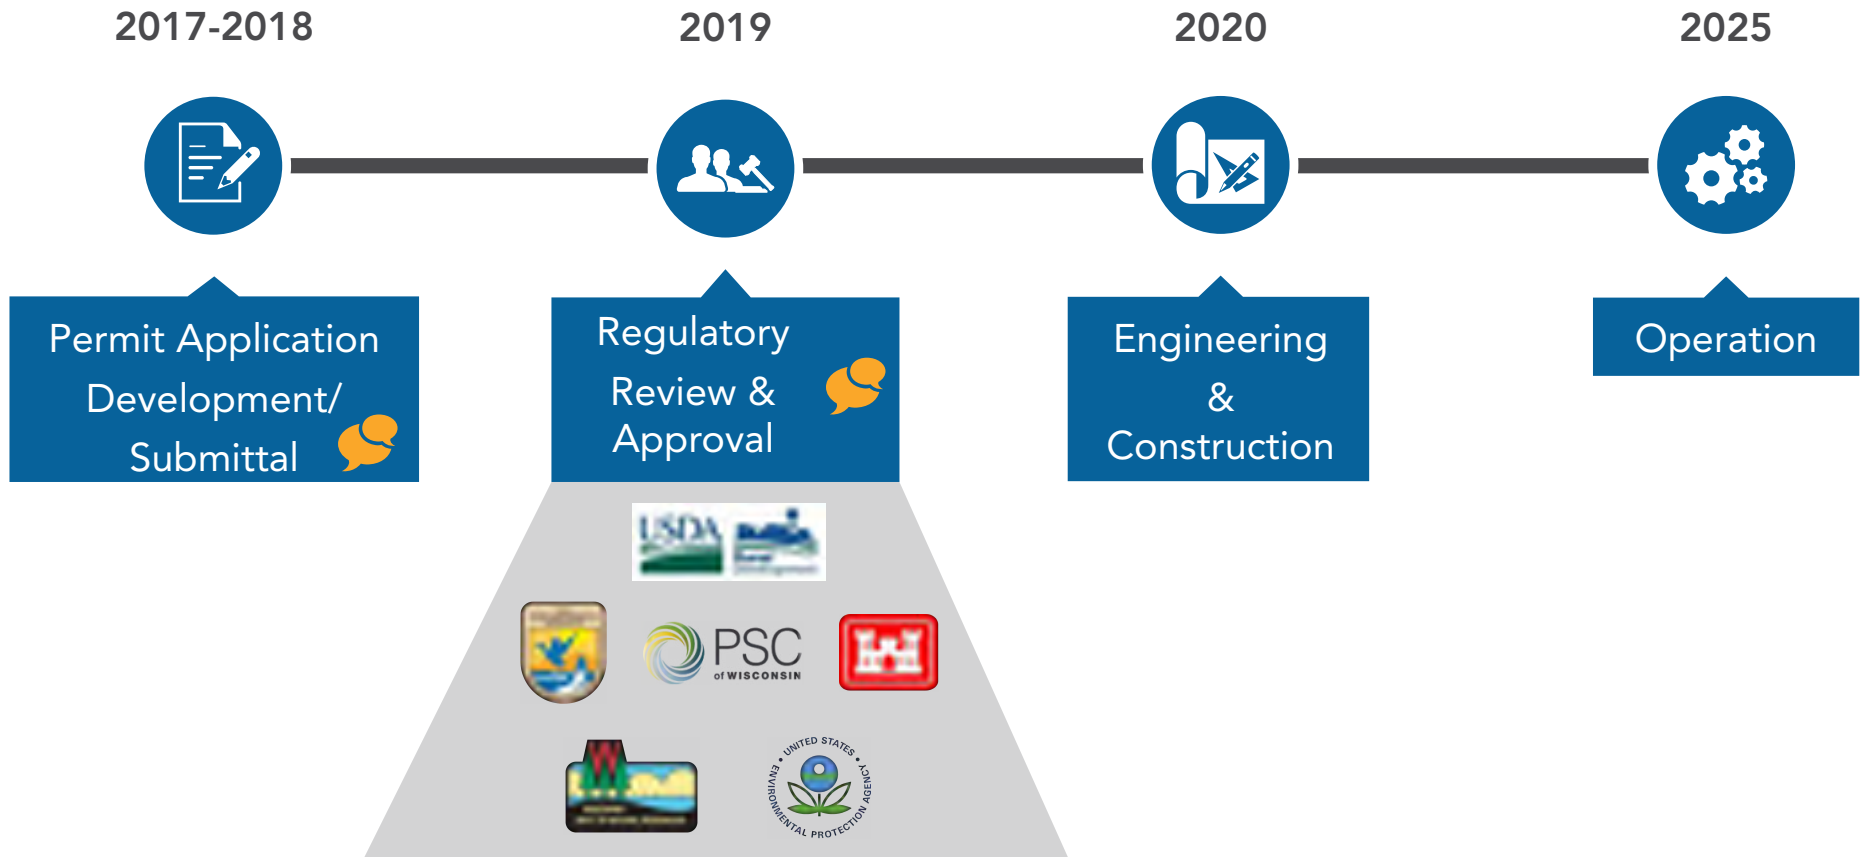

Approximately 10-acre substation associated with the transmission line

Public Comment Period

Nemadji Trail Energy Center

U.S. Department of Agriculture Rural Utilities Service

You are invited to participate in the National Environmental Policy Act (NEPA) process by voicing your ideas, suggestions, or concerns related to the proposed Nemadji Trail Energy Center. These comments will be considered as the Draft Environmental Assessment (EA) is developed. Feel free to attach additional sheets as needed.

Comments:

I would like to see Nat. Gas Suppliers required to capture leaking gas from wells and pipelines etc. The Trump admin is trying to weaken the rules put into place by the EPA. While our power ~~is~~ may involve in gas supply you are end users and if you are going to promote this as "green" you should be helping push the suppliers to clean up their act. You have the leverage to demand this so use it! Thank you.

Comments:

I think that this project will be a great asset to the state of Wisconsin and the city of Superior. I think that this project will be a great energy production to the power grid. It seems as though Dainoff has done the homework with this project, it will have a minimal impact to the environment. I am all for this project.

RE: Minnesota Power and Dairyland Power Cooperative – Stakeholder Workshop

Dear Todd Janigo,

Minnesota Power and Dairyland Power Cooperative are proposing to build a 525-550 megawatt natural gas generation facility in Superior, Wisconsin, called the Nemadji Trail Energy Center. This center will use flexible and efficient natural gas to enable the addition of more renewable energy resources such as wind and solar, and to deliver affordable and reliable power to consumers in the region.

The Nemadji Trail Energy Center is integral to plans at Minnesota Power and Dairyland Power Cooperative to add renewable energy sources, reduce carbon emissions and preserve reliability for energy users. It will provide added flexibility to reliably balance growing renewable resources and ensure the lights come on for consumers when the wind doesn't blow or the sun doesn't shine. It will provide clean energy while preserving safe, affordable and reliable supplies of energy for those who depend on us to power homes, schools, hospitals and the natural resource-based industries that fuel our region's economy.

We are hosting a stakeholder workshop as an opportunity for various leaders in Minnesota and Wisconsin to learn more about the project, and we hope that you will join us.

Date and Time: Thursday, July 13, 2017, 10:00 a.m. – 12:00 p.m.

Location: Barkers Island Inn & Conference Center
Michigan Ontario Room
300 Marina Drive
Superior, WI 55880

Please RSVP by July 6 by emailing tess.nejedlo@hdrinc.com or calling (763) 591-5490.

The workshop will include a brief presentation, small group discussion, a Q&A session, and materials for your review and use. If you are unable to attend, please send a representative from your organization in your place. If another representative from your organization is better suited to attend, you are welcome to bring that person with you or have them join us in your place. We look forward to working with you at the upcoming workshop.

Please note: This workshop is our initial outreach for the project, so at this time we would like to limit the group to various leaders in the community. However, following the workshop, there will be several opportunities for members of the public to learn about the project and provide their valuable input as well.

If you have any questions in the meantime, please feel free to contact us.

Sincerely,

Daniel McCourtney
Environmental & Land Supervisor
Minnesota Power

About the Nemadji Trail Energy Center

Minnesota Power and Dairyland Power Cooperative are proposing to build a 525-550 megawatt gas generation facility in Superior, Wisconsin, called the Nemadji Trail Energy Center. This Center will be a flexible and efficient energy source to enable renewable energy resources such as wind and solar, to deliver affordable and reliable power to consumers in the region.

The Nemadji Trail Energy Center is integral to plans at both Minnesota Power and Dairyland Power Cooperative to increase renewable energy sources, reduce carbon intensity and preserve reliability for energy users. It will provide added flexibility to reliably balance growing renewable resources and ensure the lights go on for consumers when the wind doesn't blow and the sun doesn't shine. It will provide clean energy while preserving safe, affordable and reliable supplies of energy for those who depend on us to power homes, schools, hospitals and the natural resource based industry that fuels our region's economy.

What type of gas generation facility is this project?

This project will be a combined-cycle gas generation facility which burns natural gas in a combustion turbine (like a jet engine) to produce high-pressure, high-temperature gas that is then used to spin a turbine. This is an efficient and reliable way to produce energy while supporting growing renewable resources, minimizing emissions and increasing energy output to meet the energy needs of consumers served by Minnesota Power and Dairyland Power Cooperative.

The image above is a rendering of the potential facility.

Benefits

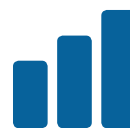

Enable and energize renewables

Provides an affordable source of fuel

Enhances reliability to support increased demand

Creates more efficient energy

Reduce emissions for cleaner energy

OPERATION

Project Overview

Project Area

Minnesota Power and Dairyland Power Cooperative have provided energy in the region for decades. The facility is proposed at a shovel-ready industrial site adjacent to and controlled by the project partners, as shown on the map below. The site has access to two interstate gas pipelines. A six-mile transmission line will be needed to connect the facility to the existing transmission grid.

A Unique Collaboration

Who is Minnesota Power?

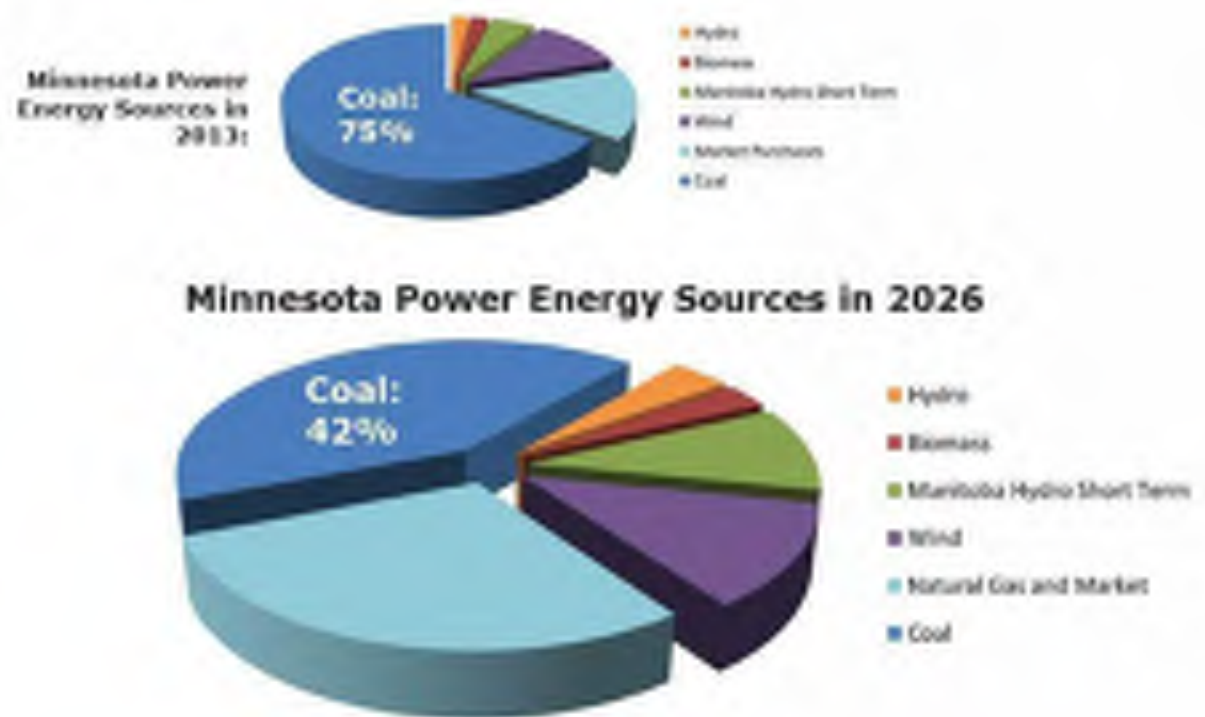

- Division of ALLETE
- Located in Duluth, MN
- 26,000 sq. mi. Service Area
- Supplies retail electric service to 144,000 customers and wholesale electric service to 16 municipalities

EnergyForward

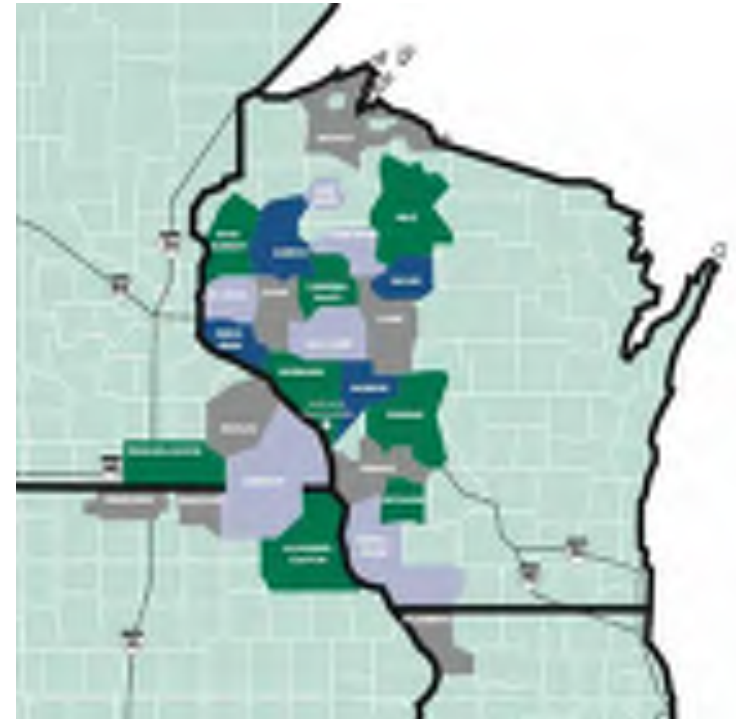

- Safe, reliable and cleaner energy
- Diverse energy mix
- Exceeds MN's renewable energy standards

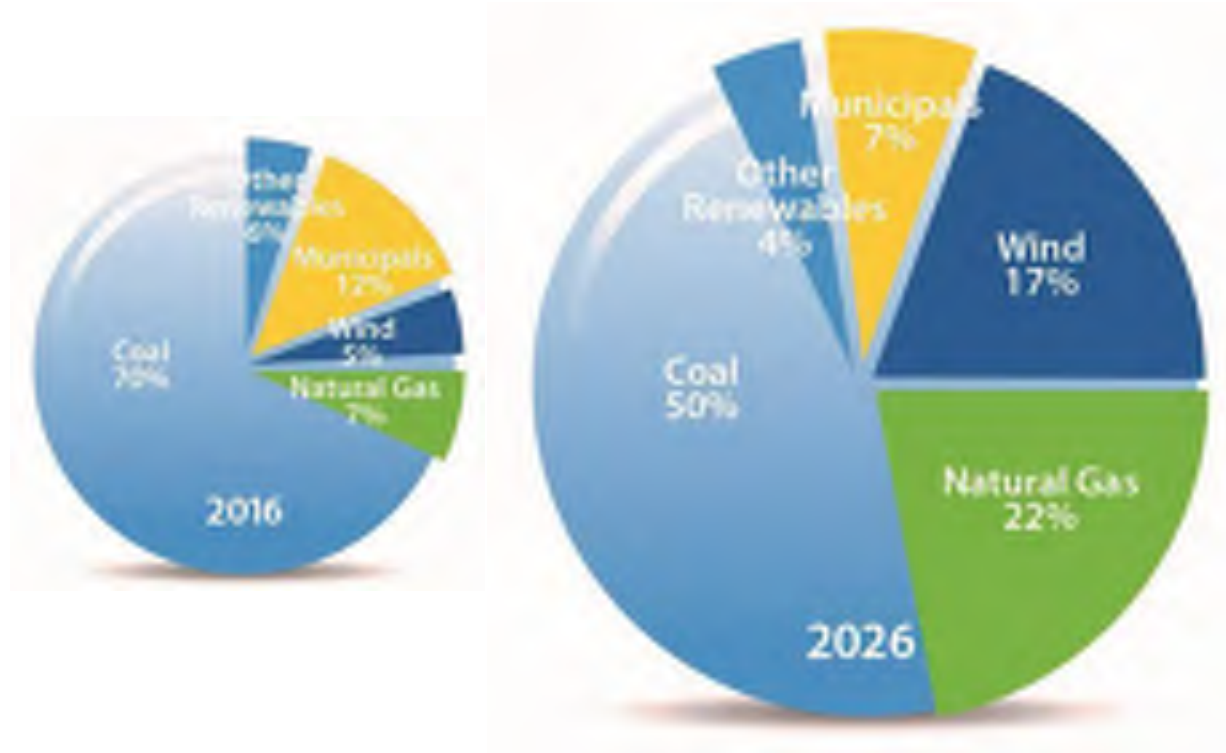

Who is Dairyland Power Cooperative?

- Wholesale power cooperative created in 1941 serving portions of four states
- Headquartered in La Crosse, WI
- 24 member cooperative systems and 17 municipal customers
- Serves approximately 600,000 people

Dairyland's “Preferred Plan” for Resource Diversification

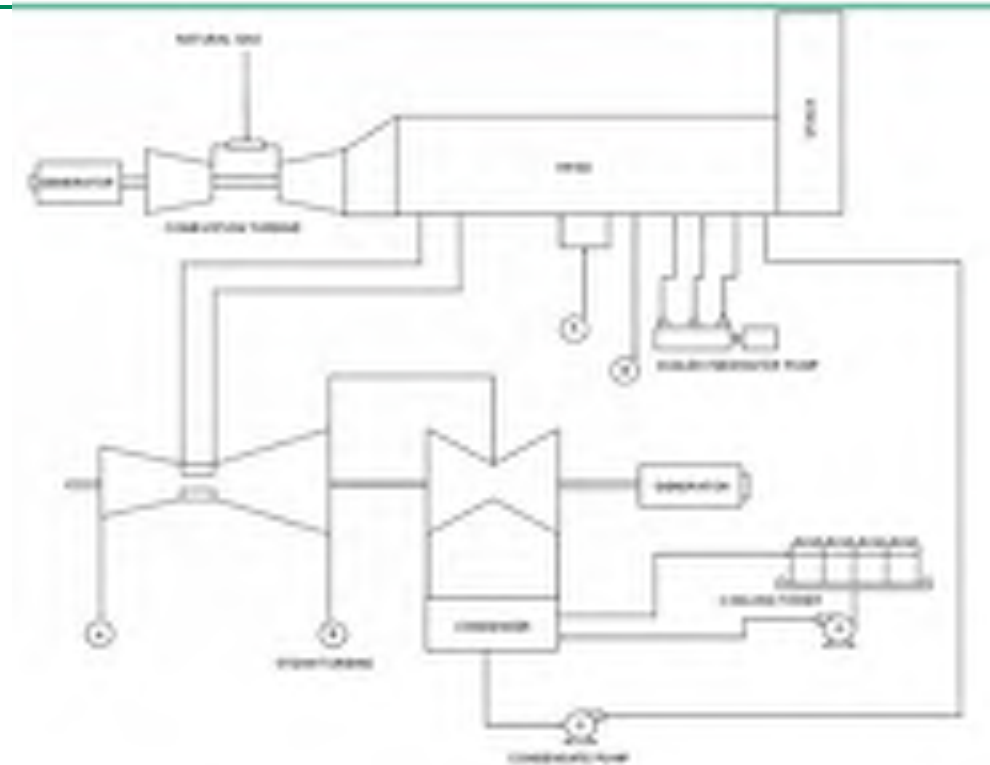

***Safe, Reliable, Sustainable,
Affordable Electricity***

Project Overview

What is a Combined-Cycle Natural Gas Plant?

- Burns natural gas in a combustion turbine
- Produces high-pressure, high-temperature gas that spins a turbine
- Efficient and reliable

Anticipated Schedule

Q & A

Table Exercise Study Area Review

Table Exercise | Discussion Topics

- What is the history of the project area?
- Are there any current and future land use / growth areas?
- Are there any critical roads in the area?
- Do you know of any environmental impacts?
- Who owns the property in this area?
- How does this community like to be engaged?
- Is this an active community?
- What available datasets could you provide that would be helpful, moving forward?

Wrap Up

- Additional discussion
- Complete input surveys

Join us at an upcoming
public open house!

Thank You
